This Thesis Is Submitted For The Degree of Doctor of Philosophy

Cass Business School, City University London

March 2011

Table of Contents

Chapter 1 Introduction	1
1.1. The nature of this study	1
1.2. Purposes and contribution of this study	1
1.3. The geography and population structure of Indonesia	2
1.4. Thesis Organization	5
Chapter 2 An Overview of the Indonesian Banking Sector	7
2.1. Introduction	7
2.2. The current structure of Indonesian banking	7
2.2.1. Institutional Structure of Indonesia's Banking Sector	7
2.2.2. Market Structure of Indonesia's Banking Sector	9
2.3. How the banking system has developed	10
2.3.1. Banking deregulation 1988	11
2.3.2. Banking crisis 1997-1998	12
2.3.3. Policy responses after the crisis	13
2.3.4. Foreign acquisitions in Indonesian banks	14
2.4. Banks in the wider economy	15
2.4.1. Macroeconomic development	16
2.4.2. The role of banks in macroeconomy	18
Chapter 3 Competition in Indonesian Provincial Banking Deposit Market..	25
3.1. Introduction	25

3.2. Provincial Banking Markets	26
3.3. Literature Review	30
3.3.1. Theory of Competition	30
3.3.2. Market Power and Efficiency Hypothesis	32
3.3.2.1. Market Power	32
3.3.2.2. Efficiency Hypothesis	33
3.3.3. NEIO model: Panzar and Rosse (PR)	34
3.3.4. Review of Empirical Works	36
3.3.4.1. Market Power (SCP studies)	36
3.3.4.2. Efficient Structure hypothesis empirical studies	37
3.4. Data and Methodology	43
3.4.1. Data	43
3.4.2. The application of production technology for the PR model	47
3.5. Model Specification	49
3.5.1. Market-power and efficient-structure hypothesis	49
3.5.1.1. Market- hypothesis – SCP model	49
3.5.1.2. Efficient-structure hypothesis	50
3.5.2. Modified Panzar and Rosse Model	51
3.6. Empirical Results	51
3.6.1. Baseline Model Results	52
3.6.1.1.SCP	52
3.6.1.2. Efficient structure hypothesis	56

3.6.1.3. Dynamic Panzar and Rosse	59
3.6.2. Robustness Checks	62
3.6.2.1. Dynamic Panzar and Rosse	62
3.6.2.2. Efficiency structure hypothesis	62
3.7. Conclusions	65
Chapter 4 Efficiency of Foreign Bank in Indonesia	68
4.1. Introduction	68
4.2. Literature Review	68
4.2.1. Theory of Production and Technical Efficiency	68
4.2.2. Review of Efficiency Measurement Methods	70
4.2.3. Review of Empirical Studies	75
4.3. Data and Methodology	78
4.3.1. Data	78
4.3.2. The implementation of SFA	84
4.3.3. Model Specification	86
4.4. Empirical Results	88
4.4.1. Baseline and Preferred Model Results	88
4.4.2. Robustness Checks	92
4.5. Conclusions	97
Chapter 5 The Role of Banks in Monetary Policy Transmission in Indonesia	99
5.1. Introduction	99
5.2. Monetary Policy Developments	99

5.3.	Literature Review	101
5.3.1.	Classical interest rate or money view	102
5.3.2.	The broad credit channel	102

Acknowledgements

I would like to express my gratitude to my supervisor, Dr. Alistair Milne, for his excellent guidance and critical comments, which were crucial in completing this thesis. In particular, he reviewed many previous drafts of this work with regular encouragement and long patience. I am deeply indebted to him for many helpful comments and brilliant suggestions.

I am also thankful to my advisors Prof. Geoffrey Wood, Prof. Giovanni Urga and the member of Banking Research Center's at Cass Business School especially Prof. Shelagh Heffernan and Dr. Barbara Casu for their encouragement and guidance.

Special thanks are due to the Board of Governors of Bank Indonesia that generously supported my studies both at Columbia University during 1997-1998 and at Cass Business School, City University of London since October 2007. In particular, I would like to express my appreciation to the Governor Mr. Burhanuddin Abdullah, Deputy Governors: Dr. Muliaman D. Hadad, Mrs. Siti Ch. Fadrijah, Mr. Budi Mulya and Dr. Halim Alamsyah for their kind support and encouragement.

I am also very grateful to some individuals in Bank Indonesia for their help in many ways. Specifically, in the Banking Sector, I would like to thank Dr. Wimboh Santoso, Dr. Agusman, Mrs. Ita Rulina and all my good friends at Financial Stability Bureau. In the Monetary Sector, I am thankful to Dr. Perry Warjiyo, and Dr. Juda Agung. In the Directorate of Human Resource, I wish to express my thanks to Mr. Gatot Sugiono, Mrs. Nita Yosita and Mr. Rudi Susetyo. In Bank Indonesia's Representative Office in London, I also would like to thank Mr. Budiman Kostaman and Mr. Dian E. Rae. The support provided by all of my friends in Bank Indonesia is also gratefully acknowledged.

I am particularly indebted to my father and my mother, who taught me that education is one of the keys to unlock the mystery of life and would like to thank my mother for her unflagging prayers and encouragement. I also take this opportunity to express my gratitude to my brothers and sisters and their family, for their help, kindness and prayers.

Very special thanks to my wife, Nila Yuliawati Soeyasa Besar and our lovely daughter, Amanda Soeyasa Besar. Without their love, support and patience I would not have accomplished, or even started this work.

Finally, I thank Allah SWT for His guidance and the opportunities provided for me.

Abstract

This thesis investigates competitiveness of banking market in Indonesia and monetary policy transmission during the period 2000 to 2009. As has been the case for most previous structure-performance studies, the results using the SCP specification are not very robust. When PR approach is used, as done in other studies, it reveals much evidence of imperfect competition in Indonesian provincial markets. The estimated values of H-statistics for the sample period 2001-2008 are positive ranging between 0.31 - 0.62 which is consistent with the study by Claessens and Laeven (2004). We find that the market in Java and Sumatra is more competitive than metropolitan and the periphery. H-statistic of metropolitan and the periphery are 0.31 and 0.52 respectively while Java and Sumatra is 0.62. However, the weakness of PR modeling is that it does not tell us much about the sources of imperfect competition, what can be done to change matters. The estimation using ES hypothesis specification does not also reveal significant influence of the geography of Indonesia. Although there is a modest impact of the geography of Indonesia on the level of competition, the development that help overcome geographical barriers, e.g. new banking technologies can usefully promote competition in Indonesian deposit markets.

In measuring the efficiency of the Indonesian banks, we find that the mean of cost-efficiency was in the range of 40%-50%. State-owned banks were found to be relatively more cost-efficient than foreign banks. The analysis suggests several conclusions about banking efficiency in Indonesia. Firstly, foreign ownership has positive effect on improved cost efficiency of the banks. However, the changing effect is small. Secondly, it appears that although old foreign banks are able to maintain comparable efficiency to the new acquired foreign banks, old foreign banks' efficiency tend to worsen. They need to hire more skilled workers and install better working environments. .

Finally the result of the role of banks in monetary policy in Indonesia shows that there is an operative lending channel in Indonesia. We also find evidence that large banks are more responsive, while high liquidity and high capitalization banks are less responsive to the changes in monetary policy.
