Literary Non-Fiction and the Neoliberal City: Subalternity and Urban Governance in Katherine Boo’s *Behind the Beautiful Forevers*

**Abstract**

In this article I challenge the claims made for Katherine Boo’s *Behind the Beautiful Forevers* as a piece of non-fiction, using the text to attend to continued questions around subaltern agency and voice that have been at the centre of postcolonial studies since Gayatri Chakravorty Spivak asked her field-shaping question, ‘Can the Subaltern Speak?’. Reading Spivak’s essay alongside *Beautiful Forevers* foregrounds the continued relevance of her question in the post-Millennial context of the neoliberal city, particularly as it relates to issues of urban governance. The article demonstrates that a rigorous postcolonial reading of Boo’s book tells us something more about subalternity in the twenty-first-century Indian city, the violent social and spatial infrastructures of which continue to be shaped by the enduring legacies of colonialism, even as these are in turn exacerbated by more recent ideologies and policies of neoliberal urban governance. It concludes by arguing that *Beautiful Forevers*, and perhaps the genre of creative or literary non-fiction more widely, is undoubtedly responding to, and at times both complicit with and resistant to, this regime.

**Keywords:** Katherine Boo, Gayatri Spivak, literary non-fiction, Mumbai, subalternity, the neoliberal city, urban governance

***

The Pulitzer Prize-winning American journalist, Katherine Boo, published her self-identifying ‘non-fictional’ narrative, *Behind the Beautiful Forevers: Life and Death in a Mumbai Slum*, in 2012 to almost unanimous critical acclaim. The book documents a series of events in the lives of a community of slum dwellers resident in Annawadi, an informal housing settlement situated close to Mumbai’s international airport. While most of the book’s early reviews unquestioningly celebrated Boo’s shrewd journalistic eye and immersive writing style, some did highlight the tension arising from, on the one hand, the book’s status as a piece of non-fiction, and on the other, the novelistic, seemingly fictional qualities of its narrative content. Yet even in these more cautious analyses, concerns around Boo’s ventriloquizing of the inner thoughts of Mumbai’s slum dwelling classes are swiftly put to one side, as renowned scholars of Indian writing such as William Dalrymple and...
Amit Chaudhuri concur that, in the end, the content of *Behind the Beautiful Forevers* justifies its non-fictional claims. The book’s non-fictionality has since been cemented by its winning of a number of non-fiction prizes from prestigious organizations including PEN, the Los Angeles Times Book Awards, the New York Public Library and the American Academy of Arts and Letters. Most notably, *Beautiful Forevers* was in 2012 awarded the US National Book Award for Non-fiction.

In this article I wish to explore the complexities of the claims made for *Behind the Beautiful Forevers* as a piece of non-fiction, using the text not to dispute them (though they will be challenged), but rather to attend to continued questions around subaltern agency and voice that have been at the centre of postcolonial studies since Gayatri Chakravorty Spivak asked her field-shaping question, ‘Can the Subaltern Speak?’.

Reading Spivak’s essay alongside Boo’s text foregrounds the continued relevance of (and also necessary amendments to) her question in the post-Millennial context of the neoliberal city, particularly as it relates to urban governance and the subalternity of ‘the lowest strata of the urban proletariat’, to whom Spivak herself has drawn attention (1999, 269; see also Franco, 215).

I contend that as Indian creative non-fiction—especially about that which addresses the subcontinent’s cities—urban spaces becomes an increasingly lucrative and ‘prized’ (Huggan, 105-121) genre in the postcolonial literary marketplace, I contend that postcolonial criticism must read such texts—for their literary qualities, which in Boo’s case, speak to postcolonialism’s ongoing self-reflexive critique of ‘theory’s embeddedness in global

---

1 Throughout this article, when citing Spivak’s essay I will refer to the first full-length version published in 1988 (rather than the shorter first version, published in *Wedge* in 1985). I also refer to its later incarnation as Chapter 3 of *A Critique of Postcolonial Reason* (1999), where Spivak further fleshed out her argument yet further.
capitalism’—the ‘signal contribution’, according to Pheng Cheah, of Spivak’s original essay (179).

The emergence of non-fiction as a new postcolonial literary category must not therefore deter postcolonial criticism from its resistant reading practices it has developed. Self-proclaimed non-fictional texts such as Beautiful Forevers, which embed themselves in and then appear to conceal a set of neocolonial power relations, can still be productively critiqued. Indeed, this article hopes to demonstrates that a rigorous postcolonial reading of Boo’s book tells us something more about subalternity in the twenty-first-century Indian city, the violent social and spatial infrastructures of which continue to be shaped by the enduring legacies of colonialism, even as these are in turn exacerbated by more recent ideologies and policies of neoliberal urban governance.

The article centres on Beautiful Forevers’ reproduction of a set of literary and cultural tropes that derive directly from Spivak’s perennial postcolonial question of whether the subaltern can or cannot speak. In particular, Boo’s narrative addresses itself to the phenomenon of sati (or suttee), British imperialism’s strategic (mis)labelling of self-sacrificial widow burning in early British India and the issue on which Spivak’s essay hinges. Boo’s account of the lives of slum dwellers in Mumbai is unashamedly narrativized, organising reams of surveys and hours of recorded interviews and video footage—an ethnographic project that ecrings withhoes Spivak’s description of neocolonialist ‘UN-style universalism’ (361)—into a neat and highly readable story. Nevertheless, in theis process of organising the complex entanglements of slum life into her concise and apparently contained narrative, Boo revealingly positions the self-immolation of an urban subaltern woman at the heart of her story. This act, around which the rest of Beautiful Forevers
revolves, explicitly invokes the discursive and legal implications of sati, the cultural practice that Spivak uses to frame her question.

I will first unpack the problematic assumptions of Beautiful Forevers’ claim to non-fictionality by situating it within the emerging larger and increasingly popular field of non-fictional writing in India, before then proceeding to lever open the political implications of the book’s surface level claim to capture subaltern voices by highlighting the book’s invocation of sati. Such an emphasis alters the text, forcing it to reveal the discursive knots that disrupt its otherwise smooth, transparent narrative, an aesthetic and political project that pertains to India’s contemporary neoliberal urban governance in particular. If As Cheah remarks in his reading of Spivak’s essay, ‘the clamour for and claim to have retrieved the true voice consciousness of the subaltern [is] deeply complicit with the continuing development of capital’ (181), these concerns that are both embedded within and self-reflexively addressed by Boo’s narrative. Focusing on Beautiful Forevers’ account of subalternity and urban governance reveals that embedded into the literary components of her non-fictional narrative is a ‘caution, a vigilance, a persistent taking of distance always out of step with total involvement’, which Spivak herself claims ‘is all that responsible academic criticism can aspire to’ (1999, 362).

In conclusion, I will suggest that the recurrence of the image of the self-immolating subaltern woman in Boo’s non-fictional text exposes the endurance of colonial apparatuses such as law, infrastructure and bureaucracy into the twenty-first century, even as these are complicated and exacerbated by India’s contemporary neoliberal urban governance. That the British colonial legal apparatus continues to impinge on Boo’s literary non-fictional depiction of Mumbai evidences the enduring qualities of imperialism’s foundational infrastructural base, despite the fact that the
city’s social and spatial arrangements have been fundamentally reshaped since India’s post-1990s economic liberalisation. It is the emphasis on these continuing material circumstances, I argue, that allow Boo’s text to offer a pertinent reminder of the self-critical and anti-hegemonic efforts that have long-informed the critical efforts of postcolonial writing, both literary and theoretical.

Literary Non-Fiction and the Subaltern Voice

Attending to the poorest inhabitants of a city widely seen as epitomising the violent conditions wrought by neoliberal urban governance (see Davis, 36; Harvey, 18), Beautiful Forevers attracted reviews from notable cultural critics and historians of India. Some of these commentaries drew attention to the sticky problem of Boo’s assumed ability to represent the outer and inner lives of Mumbai’s underclass. As William Dalrymple observes, ‘It is never easy for a middle-class intellectuals have conveyed... the struggles of the lives of the poor and disadvantaged [...]’; while acknowledging that ‘few [...] have succeeded without sounding either condescending or voyeuristic’, he maintains that ‘Boo has succeeded better than any of them’. Amit Chaudhuri similarly comments that while Boo’s ‘own absence from the encounters with her biographees, the complete and unflagging access to their thoughts and speech, [and] the decision to adopt the novelistic approach [...] are the greatest risks Boo takes’, Beautiful Forevers should nevertheless be considered ‘a small classic of contemporary writing’.

Meanwhile, writing in the Los Angeles Review of Books, Elsewhere, Liam Julian cites Boo herself comments that Boo, aware “that in his celebration of the book:

In interviews she has confessed to initially doubting that she, new to India, so fresh to the country and its people, could make a serious and valuable journalis...
contribution. And certainly she knew that Indians can be prickly about non-Indian writers who, they perceive, [...] descend on their country, stick tape recorders in a few faces, and then jet back west to pen bestsellers’, practices in Beautiful Forevers a [...] Her distaste for conjecture notwithstanding, she does hold a strong position, make an argument, which is embodied in her writing—‘an argument for reportorial humility’.

And Meanwhile Daniel M. Murtaugh, though lamenting that is similarly uncritical of Boo’s project:

[...] this being a work of journalism rather than scholarship, we do not have the apparatus of footnotes and source lists that can help us retrace the process by which Boo—a Westener married to an Indian but with no proficiency in the languages of India—pieced this novelistic texture together’. [Nevertheless,] I very much want her account to hold up, because claims this should be forgiven because she conveys ‘it conveys such an inspiring and heartbreaking sense of the obduracy of hope’.

These commentaries are representative of Beautiful Forevers’s early reception.² They raise the thorny issue of concerns about the neocolonial power relations clearly embedded in the non-fictional claims of Boo’s text, before tautologically excusing them on the grounds of the ‘humility’ and ‘hope’ that they claim she has infused, formally, into her ‘novelistic’, yet somehow still journalistic, account.

But despite this almost unanimous celebration, I would argue that the text’s claims to capture the subaltern voice surely cannot be overlooked because Boo herself practices with ‘reportorial humility’, or because the narrative itself constructs a ‘heartbreaking sense of the obduracy of hope’. these somewhat abstract traits. To better make this argument, Beautiful Forevers might helpfully needs to be situated here in the

² All of these reviews were published in US or UK outlets. Through reviews of Beautiful Forevers in India itself are far harder to come by (the book appears not to have garnered anywhere near as much of an impact there), those that do exist are still generally celebratory (see, for example, Menon). If a full account of the geography of the book’s sales figures are beyond the scope of this article, it does appear that here, as Dwivedi and Lau have argued of Indian writing in English more broadly, ‘the literary map of India is drawn for consumption and distribution by economic forces operating outside of India’ (3).
larger literary marketplace of what Dalrymple describes as ‘India’s new wave of non-fiction’, much of which focuses particularly on the city of Mumbai: Sonia Faleiro’s *Beautiful Thing: Inside the Secret World of Bombay’s Dance Bars* (2011), Pavan Varma’s *Being Indian: Inside the Real India* (2011), Anand Giridharadas’s *India Calling: An Intimate Portrait of a Nation’s Remaking* (2012), Akash Kapur’s *Indian Becoming: A Portrait of Life in Modern India* (2012). As Dominic Davies has observed, the issue of representation is foregrounded by titles such as these: ‘the first clause of these titles denotes each text’s specialist angle on India, whilst the second reaches for some “beyond” that is often framed (“portrait”) as an attempt to grasp something of India’s “inner truth”’ (120-121).

Boo’s text makes a similar rhetorical manoeuvre. Its title, *Behind the Beautiful Forevers*, references a billboard advertising a specialist tiling company that shields the view of Annawadi from the road linking Mumbai proper to its airport. That an advert for luxury housing shields the informal settlement from international arrivals to the city dramatizes Boo’s own ‘arrival’ from the US, and perhaps also the arrival of her international readership. The title thus invokes the tendency of recent Indian non-fiction to ‘frame’ its urban subject matter, before then claiming to do something more: it first offers the portrait of ‘modern India’— the ‘Beautiful Forevers’ billboard—promised by competing titles, before emphasising its ability to get ‘behind’ this image, thereby positioning itself within and moving beyond an increasingly lucrative literary marketplace.

*Beautiful Forevers* dramatizes this departure from its non-fictional peers in its form. Literary non-fiction about India tends to foreground the voice of the author/journalist, self-reflexively documenting the process of data collection—formal interviews, anecdotal

---

3 Varma’s book in particular, which attempts ‘a new and dramatically different inquiry into what it is to be an Indian’, is preoccupied by the issue of ‘Image versus Reality’ (1).
encounters, and so on. Consider, for example, Rana Dasgupta’s *Capital, A Portrait of Twenty-First Century Delhi* (2014), another comparable work of literary non-fiction. This long tome combines journalistic research and long poetic descriptions with extensive interview recordings, as well as rather derivative meditations on India’s twenty-first century urban development. Throughout *Capital* it is therefore impossible to lose sight of the perspective and voice of Dasgupta himself. Even when he gives several pages at a time over to direct quotations from his interviewees, intermittent interventions remind us that Dasgupta himself is their interlocutor, operating as a representational filter. The insertion of the journalist/author as a character in his own text thus continually reminds readers of the conditions in which the ‘non-fictional’ evidence was recorded.

In contradistinction to Dasgupta’s book and much other literary non-fictional writing about India, the other examples cited above, Boo cuts herself entirely out of *Beautiful Forevers*’s main narrative. The space and place of Annawadi—its informal infrastructure, its juxtaposition to the airport, its fraught social conditions—are described in meticulous detail, certainly, but at no point is Boo herself revealed. To use Spivak’s words, as a ‘data gatherer or activist who zealously desires access to a subject of development or oppression’, the text thus appears to ‘pay no attention to the complex social relations—patriarchy, polytheism, divisions of class, caste, and tribe—that constitute subaltern space and block access to it’ (181). Boo records numerous social interactions between a number of her slum-dwelling subjects as though the exchanges took place in her absence; readers have no sense of how her own presence as an American journalist might be impacting the scene she describes. Perhaps most problematic, however, troubling is Boo’s liberal use of free indirect discourse, where she ventriloquizes the voices and inner thoughts of

---

4 Curiously this subtitle, ‘A Portrait of Twenty-First Century Delhi’, was altered after in later editions to ‘The Eruption of Delhi’, with the word ‘portrait’ notably removed.
her subaltern subjects, as the journalist/author and assumes omniscient access not only to
the urban locale, but to the internal decision-making processes of those who inhabit it.

Of course, Boo’s decision to adopt this narrative strategy was a conscious one. She
addresses this directly in the promotional interview that accompanied the book’s publication, and these her comments are worth quoting at length:

As a reader, I sometimes find that the ‘I’ character [...] impedes the reader’s
ability to connect with people who might be more interesting than the writer, and
whose stories are less familiar. Which is not to say that the narrative without an
‘I’ is a paragon of omniscience and objectivity. Does it still need saying that
journalism is not a perfect mirror of reality, that narrative nonfiction is a selective
art, and that I didn’t write this book while balanced on an Archimedean ethical
point? My choices are reflected on every page, and I look forward to discussing
with readers whether those choices were justifiable ones. But I long ago decided
I didn’t want to be one of those nonfiction writers who go on about themselves.
When you get to the last pages of Behind the Beautiful Forevers, I don’t want
you to think about me sitting beside Abdul in that little garbage truck. I want you
to be thinking about Abdul. (Boo & Medina)

Despite this lengthy justification, it is demonstrably wrong to claim that the insertion of the
journalist figure somehow must inevitably reduces the text to an account of the author’s
subjective idiosyncrasies; the examples other authors noted above often do so with a self-
deprecatory attentiveness to the subaltern lives their writing documents. But my point here
is not to tell Boo how she should have written up her admirably extensive research; it is
rather to question the text’s distracting non-fictional claim, and to explore what that claim
reveals. Indeed, by bringing Beautiful Forevers into a fuller intertextual dialogue with
Spivak’s landmark essay, I want to demonstrate how Boo’s choices are in fact, as she
claims, ‘reflected on every page’.

Before undertaking this reading, it is first necessary to consider here—the
moment in Beautiful Forevers when Boo’s own voice does eventually appear: its
concluding ‘Author’s Note’. The other literary non-fiction writers listed above include
similar qualificatory statements that directly address issues of representation, translation and documentation. Returning once more to Dasgupta’s *Capital* as a useful counter-example, a prefatory ‘Note to the Reader’ informs us that the author has ‘changed all names (except of public figures)’, and ‘has chosen to make all characters in this book speak the same, standard, English so that their widely differing relationships to this language do not themselves become the issue’ (xiii). But indicatively, where these statements are almost all situated at the front of these non-fiction books, Boo’s author’s note is nestled at the back, after the main narrative, concealed as an appendix rather than foregrounded as a necessary qualificatory framing to be accounted for in any reading of the textion.

Here, Boo at last offers some details of her disrupting presence, throwing into relief the falsity of the claims, made indirectly through the omniscient form of her narrative, that her presence as journalist did not impact the urban environment she documents:

> My reporting wasn’t pretty, especially at first. To Annawadians, I was a reliably ridiculous spectacle, given to toppling into the sewage lake while videotaping and running afoul of the police. However, residents had concerns more pressing than my presence. After a month or two of curiosity, they went more or less about their business as I chronicled their lives. (2012: 251)

It seems unlikely that an American journalist toppling into sewage lakes, surrounded by a team of translators with notepads and tape and video recorders, would become invisible to slum dwellers even after the four years that Boo spent in Annawadi, never mind ‘a month or two’; and indeed, the text’s main narrative contradicts such assumptions.

Boo details the lives of some of Mumbai’s poorest but also most innovative inhabitants, documenting their ability to transform literally—anything—mostly garbage—into economically lucrative ventures, the profits of which they will then use to purchase their next meal (see Boo, 249). If this documentation is perhaps Beautiful Forevers’ most important journalistic contribution, these details also make it difficult to
believe that these slum-dwelling Indians would cease to view Boo, ‘after a month or two’, as a possible source of income. I want to emphasise here that it is not therefore my claim that the desperate poverty of most Annawadians means all their social relations are defined by such economic opportunism—or in David Harvey’s words, that ‘the neoliberal ethic of intense possessive individualism’ has now ‘become the template for human personality socialisation’ (14). The point is that Boo’s account itself demonstrates the divisive violence that such economic impoverishment has on social relations in the neoliberal city, between the slum dwellers themselves, certainly, but surely between Boo and her subjects as well.

What ‘fascinates’ Boo, she tells us, are the twenty-first-century city’s ‘juxtapositions of wealth and poverty’, leading her to ask the overarching question that constitutes the book: ‘there are more poor people than rich people in the world’s Mumbai’s [so why] don’t more of our unequal societies implode?’ (248). Her answer to this is, at least in part, the ruthless opportunism of many of the slum dwellers about whose lives she writes—that such opportunism would not shape, if not entirely define, Boo’s relationship with her subjects is therefore very difficult to digest. The text is thus riven by a tension that its novelistic narrative form and its un questioning use of free indirect discourse seeks to smooth away. Rather than address the complexities of this representational relationship by inserting the fact of the author/journalist’s presence—or conversely, avoiding them by marketing the book as a novel—Boo chooses to excise herself completely from the text, all the while maintaining her book’s non-fictional status. Nevertheless, these excisions are not, as I will now go on to demonstrate, as complete as they may at first appear.
Boo does go some way toward justifying attempts to justify her extensive use of free indirect discourse, also in the book’s concluding author’s note:

When I describe the thoughts of individuals in the preceding pages, those thoughts have been related to me and my translators, or to others in our presence. When I sought to grasp, retrospectively, a person’s thinking at a given moment, or when I had to do repeated interviews in order to understand the complexity of someone’s views—very often the case—I used paraphrase. [...] Although I was mindful of the risk of overinterpretation, it felt more distortive to devote my attention to the handful of Annawadians who possessed a verbal dexterity that might have provided more colourful quotes. [...] everyday language tended to be transactional. It did not immediately convey the deep, idiosyncratic intelligences that emerged forcefully over the course of nearly four years. (250)

In this concluding note we have, then, here the curtain is pulled back, the stage inverted—this is ‘behind the scenes’ footage. Boo describes the practicalities of her research, as well as the literary or novelistic work she has done too of moulding it into a coherent narrative. This concluding note also suggests that the book’s labelling as non-fiction is not a strategic capitulation to an increasingly lucrative literary marketplace, but is rather informed by Boo’s political agenda. As she writes on the following page, ‘I don’t try to fool myself that the stories of individuals are themselves better arguments. I just believe that better arguments, maybe even better policies, get formulated when we know more about ordinary lives’ (251). If we take Boo at her word, her non-fictional claims and novelistic style are both motivated by her desire to gain her subaltern characters political recognition at the level of government policy by better representing their inner subjectivities.

5 It is beyond the scope of this article to discuss David Hare’s stage adaptation of Behind the Beautiful Forevers, which ran at the National Theatre in 2015. Reviews of the play were mostly positive (see Isherwood). However, if we are concerned by Boo’s ventriloquizing of the subaltern voice, then the acting out of the bodies of slum dwellers by actors on a West End stage clearly raises a whole new set of concerns that I am unable to address here. Nevertheless, both this adaptation and my own tentative use of theatrical metaphors are, I would argue, invited by Boo’s narrative, much of which revolves around ‘stages’, both literal and metaphorical (see for example, Boo, 93, 177, 180).
In this self-confessed effort we find the blurring of two modes of representation: *vertreten*, or political representation (‘a proxy’), and *darstellen*, or aesthetic representation (‘a portrait’). Spivak begins ‘Can the Subaltern Speak?’ by critiquing Gilles Deleuze and Michel Foucault for committing *such this same* blurring, which ‘valorizes the concrete experience of the oppressed, while being so uncritical about the historical role of the intellectual’ (275). As Graham Riach notes in his reading of Spivak, the blurring of these related but discontinuous representational modes ‘prevents the critic from exposing the reality—what subalterns actually want—that lies behind representations’ (40). As another close reader of Spivak’s essay suggests, ‘subalterinity is not that which could, if given a ventriloquist, speak the truth of its oppression or disclose the plentitude of its being’; the ‘hundreds of shelves of well-intentioned books’—to which we might now add Boo’s text—‘claiming to speak for or give voice to the subaltern cannot ultimately escape the problem of translation in its full sense’ (Morris, 8). With Spivak’s critical insights in mind, then, Boo’s formal efforts to render herself transparent in *Beautiful Forevers* results in the quite literal ventriloquizing of the innermost thoughts of her slum dwelling characters. This move explicitly conflates *darstellen* with *vertreten*, as Boo attempts to represent Annawadians ‘within state formation and the law, on the one hand, and in subject-predication, on the other’ (Spivak, 275).

Nevertheless, *Beautiful Forevers* in fact contains, embedded within its narrative, a negotiation of these complexities, and these are illuminated when it is brought into fuller intertextual dialogue with Spivak’s essay. To draw these out, it is necessary to quote at length Spivak’s famous account of the Hindu practice of *sati*, or widow sacrifice:

The Hindu widow ascends the pyre of the dead husband and immolates herself upon it. This is widow sacrifice. (The conventional transcription of the Sanskrit word for the widow would be *sati*. The early colonial British transcribed it *suttee.*) The rite was not practiced universally and was not caste- or class-fixed.
The abolition of this rite by the British has been generally understood as a case of ‘White men saving brown women from brown men’. White women—from the nineteenth-century British Missionary Registers to Mary Daly—have not produced an alternative understanding. Against this is the Indian nativist argument, a parody of the nostalgia for lost origins: ‘The women actually wanted to die.’

The two sentences go a long way to legitimize each other. One never encounters the testimony of the women’s voice-consciousness. Such a testimony would not be ideology-transcendent or ‘fully’ subjective, of course, but it would have constituted the ingredients for producing a countersentence. (1988: 297)

If one of Boo’s overriding aims is to critique the violence of what Nikhil Anand calls Mumbai’s uneven ‘infrastructures of citizenship’ (10)—or as Boo herself terms it, ‘the infrastructure of opportunity’ (247)—then Beautiful Forevers offers a curious reworking of Spivak’s ‘most quoted and misquoted passage’ (Morris 3). Boo’s framing of her novelistic narrative (darstellen) as a manifesto for the improvement of state policies toward Mumbai’s urban poor (vertreten) invites a reconstruction of Spivak’s notorious phrase, one that might read thus: ‘A rich white woman saving poor brown people from rich brown people’. Such a reformulation registers the dynamics of neoliberal urbanism that have infiltrated and altered subaltern conditions in twenty-first-century India, stratifying power relations across as well as between national boundaries and (ex)colonizing/colonized populations. As Cheah remarks, though Spivak’s question, ‘Can the Subaltern Speak?’, ‘remains as urgent today as twenty-five years ago when the essay was first written’, the new ‘question that must be posed is whether power in contemporary globalisation operates according to the same regulative logic established under colonialism’—and so he asks, ‘how does infrastructural power operate in the contemporary [International Division of Labour] IDL?’ (188)

---

6 For a full account of the long and contested critical engagement with this phrase, as well as its references to Freud, see Morton, 112-123.
I want to argue, then, that Boo’s text self-reflexively asks us to consider and engage with the question of whether we ever ‘encounter the testimony’ of the Annawadian’s subaltern ‘voice-consciousness’, thereby speaking to Cheah’s own reframing of Spivak’s question for the neoliberal era. Moreover, it reminds us that Spivak’s concern was not so much about whether or not the subaltern could speak, but rather if it could be heard (see Riach, 11). As Spivak has more recently commented, the ‘point that I was trying to make was that if there was no valid institutional background for resistance, it could not be recognised’ (2010, 223). We should not, therefore, dismiss Beautiful Forevers for its cooption of a subaltern voice-consciousness. Following Rob Nixon, we must be aware that although ‘power, including representational power, often works at an exaggerated remove’, in the scheme of things, this hardly seems [...] the most suspect kind of distance. Relative to the invisibility that threatens the marginalized poor and the environments they depend on, the bridgework such writer-activists undertake offers a mostly honourable counter to the distancing rhetoric of neoliberal ‘free market’ resource development [...]. (26)

Worrying less about Boo’s ventriloquizing of the subaltern voice, we might instead, as Nixon advises, attend ‘seriously’ to her ‘adaptive rhetorical capacities [and] the chameleon powers that make [non-fiction writing] such an indispensable resource for creative activism’ (26). Nevertheless, so doing in turn reveals that while Boo is attempting the ‘bridgework’ of the writer-activist, there is yet more critical purchase embedded into the literary components of her novelistic narrative. Looking closely, it becomes possible to identify the text’s own self-reflexive foregrounding of the issues of subalternity as they are contained not in the explicit flow, or grain, of the text, but rather melded, almost silently, into the granular details of its plot.

As noted at the beginning of this essay, Beautiful Forevers revolves around an act of self-immolation that corresponds to Spivak’s account of sati. After an argument with
Zehrunisa, the mother of Abdul (one of Boo’s main protagonists), a desperate and somewhat erratic one-legged slum dweller called Fatima sets herself on fire:

‘What do you see, Noori?’
‘She’s pouring Kerosene on her head.’
‘Don’t, Fatima,’ Cynthia yelled, trying to make her voice heard over the music. Seconds later, the film song was overwhelmed by a whoosh, a small boom, and an eight-year-old screaming, ‘My mother! On fire!’

[...] They found Fatima thrashing on the floor, smoke pouring off her skin. At her side was a yellow plastic jug of kerosene, along with a vessel of water. She had poured cooking fuel over her head, lit a match, then doused the flames with water. (Boo, 2012: 95)

Whilst this episode invokes Spivak’s account of sati, this is not a simplistic one-to-one mapping. Fatima is very much an agent in her own self-immolation, and though she sets herself on fire, the subsequent and immediate dousing of herself in water counters what Spivak calls ‘the Indian nativist argument [...] “The women actually wanted to die”’ (1988, 297). Meanwhile, though present as a journalist, Boo’s commitment to authorial transparency leads her, at least within the text (but perhaps also without), not to intervene during this catastrophic scene: she refuses to ‘save’ Fatima from her own actions.  

Already, then, placing the template of Spivak’s account of sati over this moment in Boo’s plot reveals Fatima’s refusal—albeit a violent, if not vindictive one—to be subsumed into the philosophical logic of patriarchy and colonialism that, according to Spivak, speak for and across the woman subaltern.

However, the intertextual relationship between Beautiful Forevers and Spivak’s essay becomes more clearly delineated during the legal fall out of Fatima’s self-immolation. Though severely injured, Fatima remains conscious for several days after the event, in

---

7 We might even speculate that the international visibility that Boo’s presence in Annawadi would have signified to its inhabitants might have encouraged Fatima’s recourse to such a spectacularly violent act. Such an ethical dilemma raises questions that would need to be thoroughly grounded in more than critical conjecture, however.

URL: http://mc.manuscriptcentral.com/rjpw Email: jpw_submissions@yahoo.co.uk
which time she sets out to cause as much trouble for Zehrunisa, Abdul and their family as she is able. First, she claims that Abdul himself set her alight, a lie that is swiftly refuted by the numerous bystanders that witnessed the event—testimonies from which presumably Boo, too, compiled her narrative. Acting on the advice of ‘Poornima Paikrao, a special executive officer of the government of Maharashtra’, Fatima therefore changes her story slightly to bring a different set of prosecutorial legal proceedings against Abdul:

As the special executive officer understood, inciting a person to attempt suicide is a serious crime in India. The British had written the criminal code, and their strict anti-suicide provisions were designed to end a historical practice of families encouraging widows onto the funeral pyres of their dead husbands—a practice that relieved the families of the expense of feeding the widows.

In the new account, Fatima admitted to burning herself, then carefully apportioned the blame for this self-immolation. [...] She didn’t mention Zehrunisa, who had the best possible alibi, having been in the police station when Fatima burned. Instead, she put the weight of her accusation on Abdul.

Abdul Husain had threatened and throttled her, she said in her statement. Abdul Husain had beaten her up.

How could you bring down a family if you failed to name the boy who did most of the work? (101-102)

Situated at the book’s midway point is, then, a direct implementation of the British criminal code that was introduced to end the practice of sati (‘white men saving brown women from brown men’). The entire preceding narrative leans toward this episode, and its ramifications impact the majority of its remaining plot details—from here, Boo’s protagonist, Abdul, becomes entangled in a corrupt, criminal state bureaucracy in which justice is bought through bribes rather than administered in a courtroom. The law with which Fatima prosecutes Abdul, the sati law, is placed centre-stage, and Boo builds the rest of her literary narrative around it.

What should we make of this apparent allusion to one of the most cited paragraphs of Spivak’s essay at the centre of a book fraught with questions around voice, representation and subalternity? ‘This suicide that is not a suicide may be read as a simulacrum of [...]
truth-knowledge’ (1988, 300)—the parallels with Spivak’s essay, despite its own sometimes
circumlocutory argumentation, are uncanny. Let us look again at Poornima Parkrao, the
special executive officer of the government who is ‘commissioned to take the hospital-bed
statements of victims’ (101). A ‘pretty, plump government official […] with gold-rimmed
designer glasses’, she has been ‘dispatched’ by ‘the police’ to obtain ‘a more plausible
victim statement’ so that ‘a charge against the Husains [would] stick, and money from the
family [could be] extracted’ (101). Poornima obtains Fatima’s victim statement thus:

Gently, she helped Fatima construct a new account of the events that led to her
burning. Even when Fatima had admitted that she couldn’t read over what the
officer had written, nor sign her own name at the bottom, the woman in the gold-
rimmed glasses had remained respectful. A thumbprint would be fine. (101)

So Fatima, in fact, cannot and does not speak. Despite Beautiful Forevers’ para-textual and
formal claims to the contrary, Boo appears here to reach the same negative conclusion as
Spivak. But the text does not die in this conclusion; rather, it is in this moment of failure
that its political work begins. Here, the target of Boo’s critique becomes not Fatima, but the
endemic corruption and ruthless neoliberal opportunism of urban India’s wealthier,
supposedly ‘civil’ society—police, doctors, lawyers—all of whom are ready to rinse the last
rupees out of Mumbai’s subaltern underclass. Boo dramatises ‘the profound irony in
locating the [subaltern] woman’s free will in self-immolation’ (Spivak 1988, 303),
mobilizing a compelling critique not of the individual actions of her subaltern characters,
but the conditions of neoliberal urban governance in which they find themselves
imprisoned.

Tracing this intertextual relationship infuses other moments in the text with a self-
reflexive meta-commentary around issues of subalternity and the related blending of
aesthetic and political modes of representation. Crucially, these again pertain to Boo’s
overarching critique of the policies and corruption of neoliberal urban governance. Consider one moment in particular from relatively early in the book, when some ‘foreign journalists’ arrive in Annawadi ‘to see whether self-help groups were empowering women’:

government officials sometimes took them to Asha. Her job was to gather random female neighbours to smile demurely while the officials went on about how their collective had lifted them from poverty. [...] Asha understood plenty. She was a chit in a national game of make-believe, in which many of India’s old problems—poverty, disease, illiteracy, child labour—were being aggressively addressed. Meanwhile the other old problems, corruption and exploitation of the weak by the less weak, continued with minimal interference. (28)

The duping of these ‘foreign journalists’ by both government officials and the slum dwellers themselves—for a small fee—reveals the saturation of Mumbai’s varying layers of social and political relations by the ‘neoliberal ethic of intense possessive individualism’ noted above (Harvey, 14). But it also contributes to Boo’s project of making her own presence, as a foreign journalist, all the more invisible. By including journalists in the text, readers are either encouraged to overlook the presence of Boo herself, as a foreign journalist, or to view her as exceptional; the four years she spent in Annawadi distinguishes Boo from these fleeting visitors. In light of the book’s wider preoccupation with issues of subalternity, Boo seems to invite us here invites us to think through the entangled relationship between her own authorial transparency and ventriloquization of the subaltern voice, on the one hand, and the increasingly violent neoliberalization of urban social and political relations in Mumbai, on the other.

We can go some way toward unpicking this entanglement. By situating the above encounter within larger national and international layers of (mis)representation It is in this very entanglement that, Beautiful Forever enters into a critical dialogue with contemporary India’s neoliberal urban governance, which D. Asher Ghertner has described as a ‘rule by aesthetics’. According to this mode of urban governance, city space is transformed in both
the national and international imaginary from the dilapidated, ungoverned and informal infrastructure space of the slum into the bright, gleaming glass-scapes of shopping malls, financial districts and other neoliberal architectural edifices. This ‘rule by aesthetics’ corresponds to what Boo describes as the ‘national game of make-believe, in which many of India’s old problems—poverty disease, illiteracy, child labour—were being aggressively addressed’ (28). Such an effort, Ghertner contends, ‘requires the dissemination of a compelling vision of the future [...] and the cultivation of a viewing public that takes part in that very vision’ (1-2). Urban policy in India has become about representation rather than that which is represented, cultivating ‘new forms of cultural consumption—much of which has to do with “seeing”’ (see Varughese, 495). Is it any wonder, then, that Boo’s book congregates thematically around questions of subaltern representation (both political and aesthetic), when the urban governance that she herself claims to challenge is itself obsessed with who is seen and heard—with who, in fact, is allowed to speak?

Moments in Beautiful Forevers, such as the above quoted encounter with a group of foreign journalists, therefore function as meta-textual nods to the knowing reader who is acquainted with Spivak’s essay. For in the end, Boo’s early reviewers excuse her ventriloquizing of subaltern voices because of her the aesthetically pleasing and qualities of her undeniably compelling literary narrative. As for policies of urban development in neoliberal India, then, Boo’s project is an aesthetic one. Her claim to non-fictionality is embedded in, and yet tries also in part to subvert, the ‘truth game’ of neoliberalism. This ‘truth game’ is predicated on a set of founding ‘truths’, which are outlined succinctly by Douglas Spencer in his commentary on the architecture of neoliberalism: that ‘the economic market is better able to calculate, process and spontaneously order society than the state is
able to’; ‘that the competition between individuals facilitated by equality of access to the market is a natural state of affairs’; and ‘that its truths are a guarantee of liberty’ (2).

Here we enter into a feedback loop in which the problem of Boo’s removal of herself as author/journalist from Beautiful Forevers—so that we readers are not thinking ‘about [Boo] sitting beside Abdul in that little garbage truck’, we’re ‘thinking about Abdul’ (Boo & Medina, 2012)—is dramatized in the text’s own literary motifs. Boo plays neoliberalism’s truth game, ventriloquizing aesthetically a range of subaltern voices to further their political representation, even as her commentary details how, as Spivak herself has observed, ‘access to “citizenship” (civil society)’ can become complicit with ‘the mobilizing of subalternity into hegemony’ (1999, 309-310; see also Medovoi et al.). If as Spencer points out, the ‘rules of [neoliberalism’s] truth game require that the contrivance of its truths be concealed from the players’ (2), Boo’s literary motifs and creative narrativization lead Beautiful Forevers, despite its ostensible claims to non-fictionality, to break this fundamental rule.

Conclusion: Can the Subaltern Speak?

The recurrence of the British colonial law introduced to prevent sati—entangled as it is in multiple discursive layerings of subalternity, representation and resistance—at the centre of Boo’s twenty-first-century piece of literary non-fiction testifies to the enduring and markedly violent legacy of colonialism, even as this is re-calibrated by new modes of urban governance in the neoliberal era. Can the subaltern speak here? Beautiful Forevers’ itself suggests that this is perhaps now the wrong question to ask. Rather, we might follow Cheah to question instead Spivak’s ‘understanding of subalternity as a structural space of
difference that is always excluded by hegemonic regimes of representation as power precisely because power now functions through productive incorporation’ (208). Boo follows Spivak by trying to demonstrate that if there is ‘no valid institutional background for resistance, it [can] not be recognised’ (2010, 223). But this is embedded in the much wider constellation of neoliberal urban governance, in which previous routes of political representation (versteten) have been conflated with aesthetic concerns (darstellen). Boo’s text, and perhaps the genre of creative or literary non-fiction more widely, is undoubtedly responding to this regime, and is at times deeply complicit with it. Nevertheless, when read closely with one of postcolonial criticism’s key questions in mind, Beautiful Forevers dramatizes this dilemma, allowing the occasion for the most pernicious aspects of subalternity and urban governance in the neoliberal city to be unpicked, critiqued and perhaps even on occasion resisted.

Literary Non-Fiction and the Neoliberal City: Subalternity and Urban Governance in Katherine Boo’s *Behind the Beautiful Forevers*

**Abstract**

In this article I challenge the claims made for Katherine Boo’s *Behind the Beautiful Forevers* as a piece of non-fiction, using the text to attend to continued questions around subaltern agency and voice that have been at the centre of postcolonial studies since Gayatri Chakravorty Spivak asked her field-shaping question, ‘Can the Subaltern Speak?’. Reading Spivak’s essay alongside *Beautiful Forevers* foregrounds the continued relevance of her question in the post-Millennial context of the neoliberal city, particularly as it relates to issues of urban governance. The article demonstrates that a rigorous postcolonial reading of Boo’s book tells us something more about subalternity in the twenty-first-century Indian city, the violent social and spatial infrastructures of which continue to be shaped by the enduring legacies of colonialism, even as these are in turn exacerbated by more recent ideologies and policies of neoliberal urban governance. It concludes by arguing that *Beautiful Forevers*, and perhaps the genre of creative or literary non-fiction more widely, is undoubtedly responding to, and at times both complicit with and resistant to, this regime.

**Keywords:** Katherine Boo, Gayatri Spivak, literary non-fiction, Mumbai, subalternity, the neoliberal city, urban governance

***

The Pulitzer Prize-winning American journalist, Katherine Boo, published her self-identifying ‘non-fictional’ narrative, *Behind the Beautiful Forevers: Life and Death in a Mumbai Slum*, in 2012 to almost unanimous critical acclaim. The book documents a series of events in the lives of a community of slum dwellers resident in Annawadi, an informal housing settlement situated close to Mumbai’s international airport. While most of the book’s early reviews unquestioningly celebrated Boo’s shrewd journalistic eye and immersive writing style, some did highlight the tension arising from, on the one hand, the book’s status as a piece of non-fiction, and on the other, the novelistic, seemingly fictional qualities of its narrative content. Yet even in these more cautious analyses, concerns around Boo’s ventriloquizing of Mumbai’s slum dwelling classes are swiftly put to one side, as renowned scholars of Indian writing such as William Dalrymple and Amit Chaudhuri concur that, in
the end, the content of *Behind the Beautiful Forevers* justifies its non-fictional claims. The book’s non-fictionality has since been cemented by its winning of a number of non-fiction prizes from prestigious organizations including PEN, the Los Angeles Times Book Awards, the New York Public Library and the American Academy of Arts and Letters. Most notably, *Beautiful Forevers* was in 2012 awarded the US National Book Award for Non-fiction.

In this article I wish to challenge the claims made for *Behind the Beautiful Forevers* as a piece of non-fiction, using the text to attend to continued questions around subaltern agency and voice that have been at the centre of postcolonial studies since Gayatri Chakravorty Spivak asked her field-shaping question, ‘Can the Subaltern Speak?’.

Reading Spivak’s essay alongside Boo’s text foregrounds the continued relevance of (and also necessary amendments to) her question in the post-Millennial context of the neoliberal city, particularly as it relates to urban governance and the subalternity of ‘the lowest strata of the urban proletariat’, to whom Spivak herself has drawn attention (1999, 269; see also Franco, 215). As Indian creative non-fiction—especially about the subcontinent’s cities—becomes an increasingly lucrative and ‘prized’ (Huggan, 105-121) genre in the postcolonial literary marketplace, I contend that critics must continue to read such texts for their literary qualities. In Boo’s case, these speak to postcolonialism’s ongoing self-reflexive critique of ‘theory’s embeddedness in global capitalism’—the ‘signal contribution’, according to Pheng Cheah, of Spivak’s original essay (179).

The emergence of non-fiction as a new postcolonial literary category must not deter postcolonial criticism from its resistant reading practices. Self-proclaimed non-fictional texts such as *Beautiful Forevers*, which embed themselves in and then appear to conceal a set of

1 Throughout this article, when citing Spivak’s essay I will refer to the first full-length version published in 1988 (rather than the shorter first version, published in *Wedge* in 1985). I also refer to its later incarnation as Chapter 3 of *A Critique of Postcolonial Reason* (1999), where Spivak further fleshes out her argument.
neocolonial power relations, can still be productively critiqued. Indeed, this article demonstrates that a rigorous postcolonial reading of Boo’s book tells us something more about subalternity in the twenty-first-century Indian city, the violent social and spatial infrastructures of which continue to be shaped by the enduring legacies of colonialism, even as these are in turn exacerbated by more recent ideologies and policies of neoliberal urban governance.

The article centres on Beautiful Forevers’ reproduction of a set of literary and cultural tropes that derive directly from Spivak’s perennial postcolonial question of whether the subaltern can or cannot speak. In particular, Boo’s narrative addresses itself to the phenomenon of sati (or suttee), British imperialism’s strategic (mis)labelling of self-sacrificial widow burning in early British India and the issue on which Spivak’s essay hinges. Boo’s account of the lives of slum dwellers in Mumbai is unashamedly narrativized, organising reams of surveys and hours of recorded interviews and video footage—an ethnographic project that echoes Spivak’s description of neocolonialist ‘UN-style universalism’ (361)—into a neat and highly readable story. Nevertheless, in the process of organising the complex entanglements of slum life into her apparently contained narrative, Boo revealingly positions the self-immolation of an urban subaltern woman at the heart of her story. This act, around which the rest of Beautiful Forevers revolves, explicitly invokes the discursive and legal implications of sati, the cultural practice that Spivak uses to frame her question.

I will first unpack the problematic assumptions of Beautiful Forevers’ claim to non-fictionality by situating it within the emerging field of non-fictional writing in India, before then proceeding to lever open the political implications of the book’s surface level claim to capture subaltern voices by highlighting the book’s invocation of sati. This reading alters the text, forcing it to reveal the discursive knots that disrupt its otherwise smooth, transparent
narrative, an aesthetic and political project that pertains to India’s contemporary neoliberal urban governance in particular. If as Cheah remarks, ‘the clamour for and claim to have retrieved the true voice consciousness of the subaltern [is] deeply complicit with the continuing development of capital’ (181), these concerns are both embedded within and self-reflexively addressed by Boo’s narrative. Focusing on Beautiful Forevers’ account of subalternity and urban governance reveals that embedded into the literary components of her non-fictional narrative is a ‘caution, a vigilance, a persistent taking of distance always out of step with total involvement’, which Spivak herself claims ‘is all that responsible academic criticism can aspire to’ (1999, 362).

In conclusion, I will suggest that the recurrence of the image of the self-immolating subaltern woman in Boo’s non-fictional text exposes the endurance of colonial apparatuses such as law, infrastructure and bureaucracy into the twenty-first century, even as these are complicated and exacerbated by India’s contemporary neoliberal urban governance. That the British colonial legal apparatus continues to impinge on Boo’s literary non-fictional depiction of Mumbai evidences the enduring qualities of imperialism’s foundational infrastructural base, despite the fact that the city’s social and spatial arrangements have been fundamentally reshaped since India’s post-1990s economic liberalisation. It is the emphasis on these continuing material circumstances, I argue, that allow Boo’s text to offer a pertinent reminder of the self-critical and anti-hegemonic efforts that have long-informed the critical efforts of postcolonial writing, both literary and theoretical.

**Literary Non-Fiction and the Subaltern Voice**
Attending to the poorest inhabitants of a city widely viewed as epitomising the violent conditions wrought by neoliberal urban governance (see Davis, 36; Harvey, 18), *Beautiful Forevers* attracted reviews from notable cultural critics and historians of India. Some of these drew attention to the sticky problem of Boo’s assumed ability to represent the outer and inner lives of Mumbai’s underclass. As William Dalrymple observes, if few ‘middle-class intellectuals’ have conveyed ‘the struggles of the lives of the poor and disadvantaged [...] without sounding either condescending or voyeuristic’, he maintains that ‘Boo has succeeded better than any of them’. Amit Chaudhuri similarly comments that while Boo’s ‘own absence from the encounters with her biographees, the complete and unflagging access to their thoughts and speech, [and] the decision to adopt the novelistic approach [...] are the greatest risks Boo takes’, *Beautiful Forevers* should nevertheless be considered ‘a small classic of contemporary writing’.

Elsewhere, Liam Julian comments that Boo, aware ‘that Indians can be prickly about non-Indian writers who [...] descend on their country, stick tape recorders in a few faces, and then jet back west to pen bestsellers’, practices in *Beautiful Forevers* a ‘reportorial humility’. Meanwhile Daniel Murtaugh, though lamenting that ‘we do not have the apparatus of footnotes and source lists that can help us retrace the process by which Boo—a Westerner married to an Indian but with no proficiency in the languages of India—pieced this novelistic texture together’, claims this should be forgiven because she conveys ‘an inspiring and heartbreaking sense of the obduracy of hope’. These commentaries are representative of *Beautiful Forevers*’s early reception.\(^2\) They raise concerns about the neocolonial power

\(^2\) All of these reviews were published in US or UK outlets. Through reviews of *Beautiful Forevers* in India itself are far harder to come by (the book appears not to have garnered anywhere near as much of an impact there), those that do exist are still generally celebratory (see, for example, Menon). If a full account of the geography of the book’s sales figures are beyond the scope of this article, it does appear that here, as Dwivedi and Lau have argued of Indian writing in English more broadly, ‘the literary map of India is drawn for consumption and distribution by economic forces operating outside of India’ (3).
relations clearly embedded in the non-fictional claims of Boo’s text, before tautologically excusing them on the grounds of the ‘humility’ and ‘hope’ that they claim she has infused, formally, into her ‘novelistic’, yet somehow still journalistic, account.

Despite this almost unanimous celebration, I argue that the text’s claims to capture the subaltern voice surely cannot be overlooked because of these somewhat abstract traits. *Beautiful Forevers* might helpfully be situated here in the larger literary marketplace of what Dalrymple describes as ‘India’s new wave of non-fiction’, much of which focuses particularly on the city of Mumbai: Sonia Faleiro’s *Beautiful Thing: Inside the Secret World of Bombay’s Dance Bars* (2011), Pavan Varma’s *Being Indian: Inside the Real India* (2011), Anand Giridharadas’s *India Calling: An Intimate Portrait of a Nation’s Remaking* (2012), Akash Kapur’s *Indian Becoming: A Portrait of Life in Modern India* (2012). As Dominic Davies has observed, the issue of representation is foregrounded by titles such as these: ‘the first clause of these titles denotes each text’s specialist angle on India, whilst the second reaches for some “beyond” that is often framed (“portrait”) as an attempt to grasp something of India’s “inner truth”’ (120-121).

Boo’s text makes a similar rhetorical manoeuvre. Its title, *Behind the Beautiful Forevers*, references a billboard advertising a specialist tiling company that shields the view of Annawadi from the road linking Mumbai proper to its airport. That an advert for luxury housing shields the informal settlement from international arrivals to the city dramatizes Boo’s own ‘arrival’ from the US, and perhaps also the arrival of her international readership. The title thus invokes the tendency of recent Indian non-fiction to ‘frame’ its urban subject matter, before then claiming to do something more: it first offers the portrait of ‘modern India’— the ‘Beautiful Forevers’ billboard—promised by competing titles, before

---

3 Varma’s book in particular, which attempts ‘a new and dramatically different inquiry into what it is to be an Indian’, is preoccupied by the issue of ‘Image versus Reality’ (1).
emphasising its ability to get ‘behind’ this image, thereby positioning itself within and moving beyond an increasingly lucrative literary marketplace.

Beautiful Forevers dramatizes this departure from its non-fictional peers in its form. Literary non-fiction about India tends to foreground the voice of the author/journalist, self-reflexively documenting the process of data collection—formal interviews, anecdotal encounters, and so on. Consider, for example, Rana Dasgupta’s Capital, A Portrait of Twenty-First Century Delhi (2014), another comparable work of literary non-fiction. This long tome combines journalistic research and long poetic descriptions with extensive interview recordings, as well as rather derivative meditations on India’s twenty-first century urban development. Throughout Capital it is impossible to lose sight of the perspective and voice of Dasgupta himself. Even when he gives several pages at a time over to direct quotations from his interviewees, intermittent interventions remind us that Dasgupta himself is their interlocutor. The insertion of the journalist/author as a character in his own text continually reminds readers of the conditions in which the ‘non-fictional’ evidence was recorded.

In contradistinction to Dasgupta’s book and the other examples cited above, Boo cuts herself entirely out of Beautiful Forevers’s main narrative. The space and place of Annawadi—its informal infrastructure, its juxtaposition to the airport, its fraught social conditions—are described in meticulous detail, certainly, but at no point is Boo herself revealed. To use Spivak’s words, as a ‘data gatherer or activist who zealously desires access to a subject of development or oppression’, the text thus appears to ‘pay no attention to the complex social relations—patriarchy, polytheism, divisions of class, caste, and tribe—that constitute subaltern space and block access to it’ (181). Boo records numerous social interactions between a number of her slum-dwelling subjects as though the exchanges took place in her

---

4 Curiously this subtitle, ‘A Portrait of Twenty-First Century Delhi’, was altered after in later editions to ‘The Eruption of Delhi’, with the word ‘portrait’ notably removed.
absence; readers have no sense of how her own presence as an American journalist might be impacting the scene she describes. Perhaps most troubling is Boo’s liberal use of free indirect discourse, where she ventriloquizes the voices and inner thoughts of her subaltern subjects and assumes omniscient access not only to the urban locale, but to the internal decision-making processes of those who inhabit it.

Of course, Boo’s decision to adopt this narrative strategy was a conscious one. She addresses this directly in an interview accompanying the book’s publication, and her comments are worth quoting at length:

As a reader, I sometimes find that the ‘I’ character [...] impedes the reader’s ability to connect with people who might be more interesting than the writer, and whose stories are less familiar. Which is not to say that the narrative without an ‘I’ is a paragon of omniscience and objectivity. Does it still need saying that journalism is not a perfect mirror of reality, that narrative nonfiction is a selective art, and that I didn’t write this book while balanced on an Archimedean ethical point? My choices are reflected on every page, and I look forward to discussing with readers whether those choices were justifiable ones. But I long ago decided I didn’t want to be one of those nonfiction writers who go on about themselves. When you get to the last pages of *Behind the Beautiful Forevers*, I don’t want you to think about me sitting beside Abdul in that little garbage truck. I want you to be thinking about Abdul. (Boo & Medina)

Despite this lengthy justification, it is demonstrably wrong to claim that the insertion of the journalist figure must inevitably reduce the text to an account of the author’s subjective idiosyncrasies; the other authors noted above often do so with a self-deprecatory attentiveness to the subaltern lives their writing documents. But my point here is not to tell Boo how she should have written up her admirably extensive research; it is rather to question the text’s distracting non-fictional claim, and to explore what that claim reveals. Indeed, by bringing *Beautiful Forevers* into a fuller intertextual dialogue with Spivak’s landmark essay, I want to demonstrate how Boo’s choices are in fact, as she claims, ‘reflected on every page’.
Before undertaking this reading, it is first necessary to consider the moment in *Beautiful Forever* when Boo’s own voice does eventually appear: its concluding ‘Author’s Note’. The other literary non-fiction writers listed above include similar qualificatory statements that directly address issues of representation, translation and documentation. Returning once more to Dasgupta’s *Capital* as a useful counter-example, a prefatory ‘Note to the Reader’ informs us that the author has ‘changed all names (except of public figures)’, and ‘has chosen to make all characters in this book speak the same, standard, English so that their widely differing relationships to this language do not themselves become the issue’ (xiii). But indicatively, where these statements are almost all situated at the front of these non-fiction books, Boo’s author’s note is nestled at the back, after the main narrative, concealed as an appendix rather than foregrounded as a necessary qualification.

Here, Boo at last offers some details of her disrupting presence, throwing into relief the falsity of the claims, made indirectly through the omniscient form of her narrative, that her presence as journalist did not impact the urban environment she documents:

> My reporting wasn’t pretty, especially at first. To Annawadians, I was a reliably ridiculous spectacle, given to toppling into the sewage lake while videotaping and running afoul of the police. However, residents had concerns more pressing than my presence. After a month or two of curiosity, they went more or less about their business as I chronicled their lives. (2012: 251)

It seems unlikely that an American journalist toppling into sewage lakes, surrounded by a team of translators with notepads and tape and video recorders, would become invisible to slum dwellers even after the four years that Boo spent in Annawadi, never mind ‘a month or two’; and indeed, the text’s main narrative contradicts such assumptions.

Boo details the lives of some of Mumbai’s poorest but also most innovative inhabitants, documenting their attempts to transform anything—mostly garbage—into economically lucrative ventures, the profits of which they will then use to purchase their next meal (see
Boo, 249). If this documentation is perhaps Beautiful Forevers’ most important journalistic contribution, these details also make it difficult to believe that these slum-dwelling Indians would cease to view Boo, ‘after a month or two’, as a possible source of income. It is not therefore my claim that the desperate poverty of most Annawadians means all their social relations are defined by such economic opportunism—or in David Harvey’s words, that ‘the neoliberal ethic of intense possessive individualism’ has now ‘become the template for human personality socialisation’ (14). The point is that Boo’s account itself demonstrates the divisive violence that such economic impoverishment has on social relations in the neoliberal city, between the slum dwellers themselves, certainly, but surely between Boo and her subjects as well.

What ‘fascinates’ Boo, she tells us, are the twenty-first-century city’s ‘juxtapositions of wealth and poverty’, a fact that constitutes the book’s overarching question: ‘there are more poor people than rich people in the world’s Mumbai’s [so why] don’t more of our unequal societies implode?’ (248). Her answer to this is, at least in part, the ruthless opportunism of many of the slum dwellers about whose lives she writes—that such opportunism would not shape, if not entirely define, Boo’s relationship with her subjects is therefore very difficult to digest. The text is thus riven by a tension that its novelistic narrative form and unquestioning use of free indirect discourse seeks to smooth away. Rather than address the complexities of this representational relationship by inserting the fact of the author/journalist’s presence—or conversely, avoiding them by marketing the book as a novel—Boo chooses to excise herself completely from the text, all the while maintaining her book’s non-fictional status.

Nevertheless, these excisions are not, as I will now to demonstrate, as complete as they may at first appear.
Sati, Self-Immolation and Colonial Law in the Neoliberal City

Boo attempts to justify her extensive use of free indirect discourse, also in the book’s concluding author’s note:

When I describe the thoughts of individuals in the preceding pages, those thoughts have been related to me and my translators, or to others in our presence. When I sought to grasp, retrospectively, a person’s thinking at a given moment, or when I had to do repeated interviews in order to understand the complexity of someone’s views—very often the case—I used paraphrase. [...] Although I was mindful of the risk of overinterpretation, it felt more distortive to devote my attention to the handful of Annawadians who possessed a verbal dexterity that might have provided more colourful quotes. [...] everyday language tended to be transactional. It did not immediately convey the deep, idiosyncratic intelligences that emerged forcefully over the course of nearly four years. (250)

Here the curtain is pulled back, the stage inverted—this is ‘behind the scenes’ footage. Boo describes the practicalities of her research, as well as the literary or novelistic work of moulding it into a coherent narrative. This concluding note also suggests that the book’s labelling as non-fiction is not a strategic capitulation to an increasingly lucrative literary marketplace, but is rather informed by Boo’s political agenda. As she writes on the following page, ‘I don’t try to fool myself that the stories of individuals are themselves better arguments. I just believe that better arguments, maybe even better policies, get formulated when we know more about ordinary lives’ (251). If we take Boo at her word, her non-fictional claims and novelistic style are both motivated by her desire to gain her subaltern characters political recognition at the level of government policy by better representing their inner subjectivities.

5 It is beyond the scope of this article to discuss David Hare’s stage adaptation of Behind the Beautiful Forevers, which ran at the National Theatre in 2015. Reviews of the play were mostly positive (see Isherwood). However, if we are concerned by Boo’s ventriloquizing of the subaltern voice, then the acting out of the bodies of slum dwellers by actors on a West End stage clearly raises a whole new set of concerns that I am unable to address here. Nevertheless, both this adaptation and my own tentative use of theatrical metaphors are, I would argue, invited by Boo’s narrative, much of which revolves around ‘stages’, both literal and metaphorical (see for example, Boo, 93, 177, 180).
In this self-confessed effort we find the blurring of two modes of representation: vertreten, or political representation (‘a proxy’), and darstellen, or aesthetic representation (‘a portrait’). Spivak begins ‘Can the Subaltern Speak?’ by critiquing Gilles Deleuze and Michel Foucault for committing this same blurring, which ‘valorizes the concrete experience of the oppressed, while being so uncritical about the historical role of the intellectual’ (275). As Graham Riach notes in his reading of Spivak, the blurring of these related but discontinuous representational modes ‘prevents the critic from exposing the reality—what subalterns actually want—that lies behind representations’ (40). As another close reader of Spivak’s essay suggests, ‘subalternity is not that which could, if given a ventriloquist, speak the truth of its oppression or disclose the plentitude of its being’; the ‘hundreds of shelves of well-intentioned books’—to which we might now add Boo’s text—‘claiming to speak for or give voice to the subaltern cannot ultimately escape the problem of translation in its full sense’ (Morris, 8). With Spivak’s critical insights in mind, Boo’s formal efforts to render herself transparent in Beautiful Forevers results in the quite literal ventriloquizing of the innermost thoughts of her slum dwelling characters. This move explicitly conflates darstellen with vertreten, as Boo attempts to represent Annawadians ‘within state formation and the law, on the one hand, and in subject-predication, on the other’ (Spivak, 275).

Nevertheless, Beautiful Forevers in fact contains, embedded within its narrative, a negotiation of these complexities, and these are illuminated when it is brought into fuller intertextual dialogue with Spivak’s essay. To draw these out, it is necessary to quote at length Spivak’s famous account of the Hindu practice of sati, or widow sacrifice:

The Hindu widow ascends the pyre of the dead husband and immolates herself upon it. This is widow sacrifice. (The conventional transcription of the Sanskrit word for the widow would be sati. The early colonial British transcribed it suttee.) The rite was not practiced universally and was not caste- or class-fixed. The abolition of this rite by the British has been generally understood as a case of ‘White men saving brown women from brown men’. White women—from the
nineteenth-century British Missionary Registers to Mary Daly—have not produced an alternative understanding. Against this is the Indian nativist argument, a parody of the nostalgia for lost origins: ‘The women actually wanted to die.’

The two sentences go a long way to legitimize each other. One never encounters the testimony of the women’s voice-consciousness. Such a testimony would not be ideology-transcendent or ‘fully’ subjective, of course, but it would have constituted the ingredients for producing a countersentence. (1988: 297)

If one of Boo’s overriding aims is to critique the violence of what Nikhil Anand calls Mumbai’s uneven ‘infrastructures of citizenship’ (10)—or as Boo herself terms it, ‘the infrastructure of opportunity’ (247)—then Beautiful Forevers offers a curious reworking of Spivak’s ‘most quoted and misquoted passage’ (Morris 3). Boo’s framing of her novelistic narrative (darstellen) as a manifesto for the improvement of state policies toward Mumbai’s urban poor (vertreten) invites a reconstruction of Spivak’s notorious phrase, one that might read thus: ‘A rich white woman saving poor brown people from rich brown people’. Such a reformulation registers the dynamics of neoliberal urbanism that have infiltrated and altered subaltern conditions in twenty-first-century India, stratifying power relations across as well as between national boundaries and (ex)colonizing/colonized populations. As Cheah remarks, though Spivak’s question, ‘Can the Subaltern Speak?’, ‘remains as urgent today as twenty-five years ago when the essay was first written’, the new ‘question that must be posed is whether power in contemporary globalisation operates according to the same regulative logic established under colonialism’—and so he asks, ‘how does infrastructural power operate in the contemporary [International Division of Labour] IDL?’ (188)

Boo’s text self-reflexively asks us to consider and engage with the question of whether we ever ‘encounter the testimony’ of the Annawadian’s subaltern ‘voice-consciousness’, thereby speaking to Cheah’s own reframing of Spivak’s question for the neoliberal era.

---

6 For a full account of the long and contested critical engagement with this phrase, as well as its references to Freud, see Morton, 112-123.
Moreover, it reminds us that Spivak’s concern was not so much about whether or not the subaltern could speak, but rather if it could be heard (see Riach, 11). As Spivak has more recently commented, the ‘point that I was trying to make was that if there was no valid institutional background for resistance, it could not be recognised’ (2010, 223). We should not, therefore, dismiss *Beautiful Forevers* for its cooption of a subaltern voice-consciousness.

Following Rob Nixon, we must be aware that although ‘power, including representational power, often works at an exaggerated remove’,

in the scheme of things, this hardly seems […] the most suspect kind of distance. Relative to the invisibility that threatens the marginalized poor and the environments they depend on, the bridgework such writer-activists undertake offers a mostly honourable counter to the distancing rhetoric of neoliberal ‘free market’ resource development […]. (26)

Worrying less about Boo’s ventriloquizing of the subaltern voice, we might instead, as Nixon advises, attend ‘seriously’ to her ‘adaptive rhetorical capacities [and] the chameleon powers that make [non-fiction writing] such an indispensable resource for creative activism’ (26). Nevertheless, so doing in turn reveals that while Boo is attempting the ‘bridgework’ of the writer-activist, there is yet more critical purchase embedded into the literary components of her novelistic narrative. Looking closely, it becomes possible to identify the text’s own self-reflexive foregrounding of the issues of subalternity as they are contained not in the explicit flow, or grain, of the text, but rather melded, almost silently, into the granular details of its plot.

As noted at the beginning of this essay, *Beautiful Forevers* revolves around an act of self-immolation that corresponds to Spivak’s account of *sati*. After an argument with Zehrunisa, the mother of Abdul (one of Boo’s main protagonists), a desperate and somewhat erratic one-legged slum dweller called Fatima sets herself on fire:

‘What do you see, Noori?’
‘She’s pouring Kerosene on her head.’

‘Don’t, Fatima,’ Cynthia yelled, trying to make her voice heard over the music. Seconds later, the film song was overwhelmed by a *whoosh*, a small boom, and an eight-year-old screaming, ‘My mother! On fire!’

[...] They found Fatima thrashing on the floor, smoke pouring off her skin. At her side was a yellow plastic jug of kerosene, along with a vessel of water. She had poured cooking fuel over her head, lit a match, then doused the flames with water. (Boo, 2012: 95)

Whilst this episode invokes Spivak’s account of *sati*, this is not a simplistic one-to-one mapping. Fatima is very much an agent in her own self-immolation, and though she sets herself on fire, the subsequent and immediate dousing of herself in water counters what Spivak calls ‘the Indian nativist argument [...] “The women actually wanted to die”’ (1988, 297). Meanwhile, though present as a journalist, Boo’s commitment to authorial transparency leads her, at least within the text (but perhaps also without), *not* to intervene during this catastrophic scene: she refuses to ‘save’ Fatima from her own actions.\(^7\) Already, then, placing the template of Spivak’s account of *sati* over this moment in Boo’s plot reveals Fatima’s refusal—albeit a violent, if not vindictive one—to be subsumed into the philosophical logic of patriarchy and colonialism that, according to Spivak, speak for and across the woman subaltern.

However, the intertextual relationship between *Beautiful Forevers* and Spivak’s essay becomes more clearly delineated during the legal fall out of Fatima’s self-immolation. Though severely injured, Fatima remains conscious for several days after the event, in which time she sets out to cause as much trouble for Zehrunisa, Abdul and their family as she is able. First, she claims that Abdul himself set her alight, a lie that is swiftly refuted by the numerous bystanders that witnessed the event—testimonies from which presumably Boo,

\(^7\) We might even speculate that the international visibility that Boo’s presence in Annawadi would have signified to its inhabitants might have encouraged Fatima’s recourse to such a spectacularly violent act. Such an ethical dilemma raises questions that would need to be thoroughly grounded in more than critical conjecture, however.

URL: http://mc.manuscriptcentral.com/rjpw Email: jpw_submissions@yahoo.co.uk
too, compiled her narrative. Acting on the advice of ‘Poornima Paikrao, a special executive officer of the government of Maharashtra’, Fatima therefore changes her story slightly to bring a different set of prosecutorial legal proceedings against Abdul:

As the special executive officer understood, inciting a person to attempt suicide is a serious crime in India. The British had written the criminal code, and their strict anti-suicide provisions were designed to end a historical practice of families encouraging widows onto the funeral pyres of their dead husbands—a practice that relieved the families of the expense of feeding the widows.

In the new account, Fatima admitted to burning herself, then carefully apportioned the blame for this self-immolation. [...] She didn’t mention Zehrunisa, who had the best possible alibi, having been in the police station when Fatima burned. Instead, she put the weight of her accusation on Abdul.
Abdul Husain had threatened and throttled her, she said in her statement. Abdul Husain had beaten her up.
How could you bring down a family if you failed to name the boy who did most of the work? (101-102)

Situated at the book’s midway point is, then, a direct implementation of the British criminal code that was introduced to end the practice of sati (‘white men saving brown women from brown men’). The entire preceding narrative leans toward this episode, and its ramifications impact the majority of its remaining plot details—from here, Boo’s protagonist, Abdul, becomes entangled in a corrupt, criminal state bureaucracy in which justice is bought through bribes rather than administered in a courtroom. The law with which Fatima prosecutes Abdul, the sati law, is placed centre-stage, and Boo builds the rest of her literary narrative around it.

What should we make of this apparent allusion to one of the most cited paragraphs of Spivak’s essay at the centre of a book fraught with questions around voice, representation and subalternity? ‘This suicide that is not a suicide may be read as a simulacrum of [...] truth-knowledge’ (1988, 300)—the parallels with Spivak’s essay, despite its own sometimes circumlocutory argumentation, are uncanny. Let us look again at Poornima Parkrao, the special executive officer of the government who is ‘commissioned to take the hospital-bed
statements of victims’ (101). A ‘pretty, plump government official [...] with gold-rimmed
designer glasses’, she has been ‘dispatched’ by ‘the police’ to obtain ‘a more plausible victim
statement’ so that ‘a charge against the Husains [would] stick, and money from the family
[could be] extracted’ (101). Poornima obtains Fatima’s victim statement thus:

Gently, she helped Fatima construct a new account of the events that led to her
burning. Even when Fatima had admitted that she couldn’t read over what the
officer had written, nor sign her own name at the bottom, the woman in the gold-
rimmed glasses had remained respectful. A thumbprint would be fine. (101)

So Fatima, in fact, cannot and does not speak. Despite Beautiful Forever’s para-textual and
formal claims to the contrary, Boo appears here to reach the same negative conclusion as
Spivak. But the text does not die in this conclusion; rather, it is in this moment of failure that
its political work begins. Here, the target of Boo’s critique becomes not Fatima, but the
endemic corruption and ruthless neoliberal opportunism of urban India’s wealthier,
supposedly ‘civil’ society—police, doctors, lawyers—all of whom are ready to rinse the last
rupees out of Mumbai’s subaltern underclass. Boo dramatises ‘the profound irony in
locating the [subaltern] woman’s free will in self-immolation’ (Spivak 1988, 303), mobilizing
a compelling critique not of the individual actions of her subaltern characters, but the
conditions of neoliberal urban governance in which they find themselves imprisoned.

Tracing this intertextual relationship infuses other moments in the text with a self-
reflexive meta-commentary around issues of subalternity and the related blending of
aesthetic and political modes of representation. Crucially, these again pertain to Boo’s
overarching critique of the policies and corruption of neoliberal urban governance.
Consider one moment in particular from relatively early in the book, when some ‘foreign
journalists’ arrive in Annawadi ‘to see whether self-help groups were empowering women’:

government officials sometimes took them to Asha. Her job was to gather random
female neighbours to smile demurely while the officials went on about how their

URL: http://mc.manuscriptcentral.com/rjpw  Email: jpw_submissions@yahoo.co.uk
collective had lifted them from poverty. [...] Asha understood plenty. She was a chit in a national game of make-believe, in which many of India’s old problems—poverty, disease, illiteracy, child labour—were being aggressively addressed. Meanwhile the other old problems, corruption and exploitation of the weak by the less weak, continued with minimal interference. (28)

The duping of these ‘foreign journalists’ by both government officials and the slum dwellers themselves—for a small fee—reveals the saturation of Mumbai’s varying layers of social and political relations by the ‘neoliberal ethic of intense possessive individualism’ noted above (Harvey, 14). But it also contributes to Boo’s project of making her own presence, as a foreign journalist, all the more invisible. By including journalists in the text, readers are either encouraged to overlook the presence of Boo herself, as a foreign journalist, or to view her as exceptional; the four years she spent in Annawadi distinguishes Boo from these fleeting visitors. In light of the book’s wider preoccupation with issues of subalternity, Boo here invites us to think through the entangled relationship between her own authorial transparency and ventriloquization of the subaltern voice, on the one hand, and the increasingly violent neoliberalization of urban social and political relations in Mumbai, on the other.

It is in this very entanglement that Beautiful Forevers enters into a critical dialogue with contemporary India’s neoliberal urban governance, which D. Asher Ghertner has described as a ‘rule by aesthetics’. According to this mode of urban governance, city space is transformed in both the national and international imaginary from the dilapidated, ungoverned and informal infrastructure space of the slum into the bright, gleaming glass-scapes of shopping malls, financial districts and other neoliberal architectural edifices. This ‘rule by aesthetics’ corresponds to what Boo describes as the ‘national game of make-believe, in which many of India’s old problems—poverty disease, illiteracy, child labour—were being aggressively addressed’ (28). Such an effort, Ghertner contends, ‘requires the dissemination
of a compelling vision of the future [...] and the cultivation of a viewing public that takes part in that very vision’ (1-2). Urban policy in India has become about representation rather than that which is represented, cultivating ‘new forms of cultural consumption—much of which has to do with “seeing”’ (see Varughese, 495). Is it any wonder, then, that Boo’s book congregates thematically around questions of subaltern representation (both political and aesthetic), when the urban governance that she herself claims to challenge is itself obsessed with who is seen and heard—with who, in fact, is allowed to speak?

Moments in Beautiful Forevers, such as the above quoted encounter with a group of foreign journalists, therefore function as meta-textual nods to the knowing reader who is acquainted with Spivak’s essay. For in the end, Boo’s early reviewers excuse her ventriloquizing of subaltern voices because of the aesthetic qualities of her undeniably compelling literary narrative. As for policies of urban development in neoliberal India, then, Boo’s project is an aesthetic one. Her claim to non-fictionality is embedded in, and yet tries also in part to subvert, the ‘truth game’ of neoliberalism. This ‘truth game’ is predicated on a set of founding ‘truths’, which are outlined succinctly by Douglas Spencer in his commentary on the architecture of neoliberalism: that ‘the economic market is better able to calculate, process and spontaneously order society than the state is able to’; ‘that the competition between individuals facilitated by equality of access to the market is a natural state of affairs’; and ‘that its truths are a guarantee of liberty’ (2).

Here we enter into a feedback loop in which the problem of Boo’s removal of herself as author/journalist from Beautiful Forevers is dramatized in the text’s own literary motifs. Boo plays neoliberalism’s truth game, ventriloquizing aesthetically a range of subaltern voices to further their political representation, even as her commentary details how, as Spivak herself has observed, ‘access to “citizenship” (civil society)’ can become complicit with ‘the
mobilizing of subalternity into hegemony’ (1999, 309-310; see also Medovoi et al.). If as Spencer points out, the ‘rules of [neoliberalism’s] truth game require that the contrivance of its truths be concealed from the players’ (2), Boo’s literary motifs lead Beautiful Forevers, despite its ostensible claims to non-fictionality, to break this fundamental rule.

**Conclusion: Can the Subaltern Speak?**

The recurrence of the British colonial law introduced to prevent sati—entangled as it is in multiple discursive layerings of subalternity, representation and resistance—at the centre of Boo’s twenty-first-century piece of literary non-fiction testifies to the enduring and markedly violent legacy of colonialism, even as this is re-calibrated by new modes of urban governance in the neoliberal era. Can the subaltern speak here? Beautiful Forevers’ itself suggests that this is perhaps now the wrong question to ask. Rather, we might follow Cheah to question instead Spivak’s ‘understanding of subalternity as a structural space of difference that is always excluded by hegemonic regimes of representation as power precisely because power now functions through productive incorporation’ (208). Boo follows Spivak by trying to demonstrate that if there is ‘no valid institutional background for resistance, it [can] not be recognised’ (2010, 223). But this is embedded in the much wider constellation of neoliberal urban governance, in which previous routes of political representation (versteten) have been conflated with aesthetic concerns (darstellen). Boo’s text, and perhaps the genre of creative or literary non-fiction more widely, is undoubtedly responding to this regime, and is at times deeply complicit with it. Nevertheless, when read closely with one of postcolonial criticism’s key questions in mind, Beautiful Forevers dramatizes
this dilemma, allowing the occasion for the most pernicious aspects of subalternity and
urban governance in the neoliberal city to be unpicked, critiqued and perhaps even resisted.
