## Genre in transnational television: A case of Netflix Originals Korean dramas

### Abstract

Recently, South Korea has become one of the largest content providers for Netflix. We analyze the textual characteristics of five Netflix Originals K-dramas - *Sweet Home* (2020), *My Name* (2021), *Squid Game* (2021), *Hellbound* (2021), and *All of Us Are Dead* (2022) – to unfold the existing genre conventions and uniquely local factors in the context of transnational television. In the process of transnationalization, genres are continuously and simultaneously evolving in the directions of homogenization and heterogenization. Universal values such as humanism, altruism, and family-oriented solidarity, as expected in the existing genre conventions, were homogenizing factors. However, these homogenizing factors were accompanied by uniquely local, heterogenizing factors arising from traumatic collective memories, political and economic situations in South Korea. We also found that webtoons played a significant role in the transnationalization of the K-dramas genre. This study contributes to genre studies and transnational television research.

**Keywords:** Netflix, genre, Korean drama, Netflix Original, transnationalization, SVOD (subscription video on demand)

1  
2  
3 In recent years, there has been a surge of Korean dramas (hereafter, K-dramas) on Netflix, resulting in  
4 South Korea becoming the second-largest content provider for Netflix, after Netflix' home country, the  
5 United States (*Yonhap News*, 20 January 2022). Netflix Originals K-dramas attracted global audiences:  
6 for example, as of June 2023, *Squid Game* (2021) is the most-watched show in Netflix's history (Sohn,  
7 2023). Although considerable research attention has recently been paid to global SVODs (subscription  
8 video on demand) services, few studies have addressed the question of how to understand the global  
9 expansion of SVODs in relation to national television industries in different countries (Wayne and  
10 Castro 2021). In addition, most scholarships concerning K-dramas and SVODs have so far focused on  
11 audience research and fandom (see Ju 2020; Lee 2018; Min et al. 2018; Park et al. 2021), while  
12 overlooking the significance of text and genre. To fill this gap in the field, this study aims to explore  
13 the textual characteristics of the five selected Netflix Originals K-dramas from 2020 to 2022, in the  
14 context of genre research and Netflix's transnationalism.

15  
16 Genres are continually evolving into new forms, and dynamically being redefined and  
17 reformulated as a result of the interplay between industry, text, and audiences (Neale 1980). Genre  
18 classification in SVODs is therefore the outcome of a discursive practice, which combines the  
19 provider's institutional context, local creative industries, audience expectations, and textual  
20 characteristics of the content. SVODs have succeeded in supplanting the extant genre system into  
21 micro—genres, providing an increasing amount of international content with personalized  
22 recommendations (Ju 2020; Orgeta 2022, 4). In comparison to the past, this new genre classification by  
23 SVODs constitutes a qualitatively more sophisticated and personally tailored approach. For example,  
24 the Netflix's recommender algorithm (NRA) is designed to assist users in making choices based on  
25 their previous selections (Khoo 2023, 293). The micro-genre system with personal recommendations  
26 seems to be one of the factors enabling a significant increase in audience retention and subscriptions.  
27 With 223 million subscribers in 190 countries (as of October 2022), Netflix is in fact the largest SVOD  
28 service worldwide (Mullin 2022). Often called "the Netflix effect", the service has transformed the  
29 ways in which content is produced and distributed, reshaping how we consume television on a global  
30 scale (McDonald and Smith-Rowsey 2016; Vettoretto and Moore 2023). In this respect, the Netflix

2  
3 Originals provide a useful lens through which we can examine how genres are continually reworked  
4 and reconfigured in the age of transnational SVODs.  
5  
6  
7

8 In the process of transnationalization, genres are continuously and simultaneously evolving in  
9 the directions of homogenization and heterogenization (Jenner 2021; Mihelj 2011). The impact of  
10 transnational SVOD platforms on locally produced television content has remained underexplored, with  
11 a limited number of recent studies concentrating on European cases (see Carelli and Garofalo 2020;  
12 Castro and Cascajosa 2020) or on Anglophone (Potter 2020). Recent studies on genre and Netflix relied  
13 primarily on a single case study: for example, Day's (2023) analysis of Netflix's stand-up special  
14 *Nanette*, focusing on gender and the comedy genre, Kim's (2021) analysis of *Mr. Sunshine*, a historical  
15 drama genre, and studies about *Squid Game* (2021) such as Kang and Lee (2022) and Jin (2022). Instead  
16 of using only one example, we used purposive sampling to select five Netflix Originals series from  
17 2020 to 2022 as follows: *Sweet Home* (2020), *My Name* (2021), *Squid Game* (2021), *Hellbound* (2021),  
18 and *All of Us Are Dead* (2022). The details of the sampling process will be explained in greater detail  
19 in the methodology section. This study thus fills this gap in literature by exploring the textual  
20 characteristics of multiple examples with a non-western origin. While Gómez and Larroa (2023)  
21 examined the case of Mexico focusing on Netflix's business strategies, more studies have been done  
22 using examples from Anglophone countries. For our analysis, we adopted Silverblatt's (2007)  
23 framework and analyzed the plots, characters, settings, trappings, and genre twists. The remainder of  
24 this paper is structured as follows: the following section provides the overview of literature on genre,  
25 transnationalization, and Korean dramas. The next section discusses the methodology, followed by  
26 findings, discussions, and conclusion.

### 51 **Genre, transnationalization, and Korean dramas**

52 Genres do not solely comprise properties possessed by texts, but also systems of orientations,  
53 expectations, and conventions that circulate between industry, text, and subjects (Neale 1980). Genres  
54 are not fixed, but rather constantly negotiated between text, industry, and viewers' expectations. The  
55  
56  
57  
58  
59  
60

1  
2  
3 advent of global SVODs destabilized the existing genre system by using micro-genre codes. As of  
4  
5 January 2023, there are over 4,000 genre codes on Netflix, constituting over 6,000 titles (Moore 2023).  
6  
7 Netflix has moved from the existing genre categories to micro-genres based on tagging systems (or ‘alt-  
8  
9 genre systems’). However, the concept of genre remains at the core of SVOD’s practice (Sim 2023),  
10  
11 and SVOD’s mechanisms of personalized recommendations and interface are heavily reliant on genre  
12  
13 (Jenner 2018). For instance, Madrigal (2014) explains that Netflix’s personalized genres are created by  
14  
15 human intelligence (e.g., Netflix’s engineers synthesizing a range of genre characteristics of content)  
16  
17 combined with machine intelligence (e.g., the individualized preference profiles that the algorithm  
18  
19 builds).  
20  
21

22  
23 Genres are also not static, but fluid; they are in constant negotiation with existing conventions  
24  
25 (that are universally recognizable) and innovative elements (that are culturally and historically specific).  
26  
27 In the process of transnationalization, genres are continuously and simultaneously evolving in the  
28  
29 directions of homogenization and heterogenization. Cultural homogenization and heterogenization co-  
30  
31 exist due to globalization and they are not mutually exclusive but deeply intertwined, reinforcing each  
32  
33 other (Appadurai 1996). Regarding such phenomena in terms of genre and television, Mittell (2004, 14)  
34  
35 argues that the goal in analyzing generic discourse is not to arrive at a genre’s proper definition,  
36  
37 interpretation, or evaluation, but to explore the material ways in which genres are culturally operative.  
38  
39

40  
41 Examples of transnationalizing genres can be found in homogenizing the existing genre  
42  
43 conventions by de-emphasizing national or cultural specificities (e.g., specific locations or specific  
44  
45 histories). For example, historical series such as *The Crown* (2016-) offer a transnational version of  
46  
47 history (Jenner 2018, 12) by focusing on the psychological inner conflict of the characters. Jenner (2021)  
48  
49 also uses the British teen drama *Sex Education* (2019) as an example to demonstrate how it adopts the  
50  
51 American genre conventions in terms of plot and visual iconography, while also remaining indebted to  
52  
53 the British tradition of teen drama in terms of storytelling. In a similar vein, Kim’s (2021) study of a  
54  
55 Korean historical drama series *Mr. Sunshine* (2018) shows how the indulgent display of settings is used  
56  
57 to provide visual spectacle to adhere to the overall aesthetic style expected by transnational audiences  
58  
59 (p. 7). The grammar of transnationalism thrives on differences between cultures; however, it also  
60

1  
2  
3 reinforces national and cultural specificity simultaneously. Mihelj (2011, 29) argues that the grammar  
4 of transnationalism does not only imply the direction of homogenization but also heterogenization, such  
5 as local authenticity.  
6  
7  
8  
9

10 Current research indicates that Netflix's commitment to geographically diverse original  
11 productions demonstrates the fundamentally local nature of global taste (Lobato 2019, 182).  
12 Cunningham and Scarlata (2020) use the examples of Australian shows such as the crime fantasy series  
13 *Tidelands* (2018) and the comedy mockumentary series *Lunatics* (2019) to illustrate how Netflix's  
14 multi-territory content strategy appeals to transnational audiences and niche clusters. Similarly, the  
15 Israeli military action series *Fauda* (2015) and the Spanish heist series *La Casa De Papel* (2017) show  
16 how streaming successes stem from a combination of local authenticity, the appeal of morally  
17 ambiguous characters, universal elements offering 'something for everyone', and topical elements that  
18 function as additional points of audience identification (Wayne and Uribe Sandoval 2021).  
19  
20  
21  
22  
23  
24  
25  
26  
27  
28  
29

30 Furthermore, Netflix's transnationalism also influences its distinctive content strategy. It  
31 employs the concepts of quality, genre and its conventions, individual narrative, visual spectacle and  
32 other cinematic aesthetics, and globally accepted values to produce content that appeals to diverse  
33 international audiences (Jenner 2018, 226). This is because Netflix's program sourcing and content  
34 strategy operate under the mechanism of multi-nationality (Lotz 2021). Recently, transnational SVODs  
35 have markedly increased their investments in original content to maintain and expand their international  
36 subscriber bases (Iordache 2022). Netflix has three licensing conditions, namely, commissions ('Netflix  
37 Originals'), co-commissions, and acquisitions, depending on the degree of funding, creative input, and  
38 rights (Lotz 2021). South Korea has the highest level of co-commissioning and is one of the top five  
39 countries in terms of commissioning (Lotz 2021). From 2016 to 2020, Netflix's investments in Korean  
40 content comprised 700 million US dollars, two local production facilities, and the signing of a multi-  
41 year content partnership with local companies CJ ENM/Studio Dragon and JTBC (Bing and Ko 2021).  
42 In 2021, Netflix invested over half a billion US dollars in Korean content (Brzeski 2022).

57

58 Regarding the growing popularity of Korean popular culture globally, Jin (2022, 6) argues that  
59 the concept of transnational proximity offers a useful theoretical framework. In transnational cultural  
60

1  
2  
3 studies, cultural proximity theory has been frequently used to explain transnational media consumption,  
4 claiming that many audiences select media products proximate to their own cultural backgrounds  
5 (Straubhaar 1991). Cultural proximity (defined by similarities in history, ethnicity, religion, language,  
6 and geography) cannot explain why audiences beyond the same region consume and enjoy popular  
7 culture from other regions (Jin 2022, 7). Transnational proximity is not based on linguistic and cultural  
8 affinities, but on the universal uniqueness, namely, specific characteristics that can be commonly shared  
9 by audiences who experience similar socio-cultural practices (Jin 2022, 8).

## 21 **Methodology**

22  
23  
24 In this study, the purposive sampling technique is used to reduce the number of materials and cases to  
25 a manageable and at the same time justifiable selection of materials and cases (Flick 2011, 38). As a  
26 non-probability sampling method, in purposive sampling, the likelihood of any one case being selected  
27 is not known and therefore the degree of generalizability is questionable (Salkind 2017, 91). However,  
28 it has the advantage of ensuring some degree of representativeness of the selected materials in the whole  
29 group. We therefore defined our sample more purposively and step by step.  
30  
31  
32  
33  
34  
35

36  
37 Firstly, we identified all the K-dramas available on Netflix from 2016 (when Netflix was  
38 introduced in South Korea) to December 2021. There were 188 titles altogether, consisting of twenty-  
39 three Netflix Originals, forty-eight produced by tvN, forty-nine by JTBC, followed by twelve by OCN,  
40 28 by terrestrial channels, thirteen by general programming channels and fifteen by others. Secondly,  
41 for all twenty-three Netflix Originals, we examined the information in “Episodes and Info” sections on  
42 Netflix. Thirdly, drawing on the Netflix website and FlixPatrol (<https://flixpatrol.com/>), we collected  
43 Netflix’s official ranking of the global top 100 shows for three years from 2020 to 2022.  
44  
45  
46  
47  
48  
49  
50  
51

52  
53 The following ten series were listed in in the top 100 worldwide in 2020 with the detailed rank  
54 in brackets: *It's Okay to Not Be Okay* (19<sup>th</sup>), *Start-Up* (32<sup>nd</sup>), *The King: Eternal Monarch* (36<sup>th</sup>), *Record*  
55 *of Youth* (48<sup>th</sup>), *Crash Landing on You* (59<sup>th</sup>), *Hospital Playlist 1* (71<sup>st</sup>), *Was It Love?* (73<sup>rd</sup>), *Sweet Home*  
56 *(74<sup>th</sup>)*, *Mystic Pop-Up Bar* (91<sup>st</sup>), and *Stranger* (100<sup>th</sup>). In 2021, *Squid Game* ranked the highest in the  
57  
58  
59  
60

1  
2  
3 global ranking, followed by *Vincenzo* (15<sup>th</sup>), *Hometown Cha-Cha-Cha* (31<sup>st</sup>), *My Name* (46<sup>th</sup>, also  
4 known as *Undercover Nemesis*), *Hellbound* (47<sup>th</sup>), *Nevertheless* (61<sup>st</sup>), *Hospital Playlist 2* (62<sup>nd</sup>), *The*  
5 *King's Affection* (71<sup>st</sup>), *Sisyphus: The Myth* (77<sup>th</sup>), and *The Uncanny Counter* (90<sup>th</sup>). In 2022, *All of Us*  
6 *Are Dead* ranked as the 9<sup>th</sup> most watched Netflix show in the world, followed by *Extraordinary Attorney*  
7 *Woo* (11<sup>th</sup>), *Business Proposal* (15<sup>th</sup>), *Alchemy of Souls* (23<sup>rd</sup>), *Twenty Five Twenty One* (45<sup>th</sup>), *Little*  
8 *Women* (51<sup>st</sup>), *Money Heist: Korea – Joint Economic Area* (53<sup>rd</sup>), *Narco-Saints* (74<sup>th</sup>), *Tomorrow* (88<sup>th</sup>),  
9 and *Our Blues* (92<sup>th</sup>).  
10  
11  
12  
13  
14  
15  
16  
17

18 In addition to the ranking, we used Creeber (2015) and Afilipoaie et al. (2021) to establish  
19 seven genre categories – namely, horror and action, thriller, crime, romantic comedy, fantasy, drama,  
20 and science fiction – to determine appropriate sampling. Based on the genre classifications, the three  
21 most frequently appearing genres were drama, crime, and horror and action. Consequently, we  
22 shortlisted the series that belong to those three categories. Finally, based on the above steps, five Netflix  
23 Original series were selected as follows: *Sweet Home* (2020), *My Name* (2021), *Squid Game* (2021),  
24 *Hellbound* (2021), and *All of Us Are Dead* (2022). These five series ranked the global top 100 in 2022  
25 to 2022, belonged to the three most frequently appearing genres – drama, crime, and horror and action  
26 – and they represented the recent global trend of exposing and satirizing social inequalities (Thorpe  
27 2022) in international television. Although there were several romance comedies in the drama genre,  
28 we selected these five series because they were more appropriate to address the research gap, that is,  
29 the textual readings of more experimental genre narratives (Kim 2022). Under the broad category of  
30 drama genre, crime, horror and action were significantly under-researched than romance, that is often  
31 considered as K-drama's representative romance genre, the so-called 'K-romances' (An 2022, 96). The  
32 details of our sample are shown in the following table (Table 1).

60

[INSERT TABLE 1 HERE]

1  
2  
3 Using the above five series, we then conducted textual analysis to examine plots, characters,  
4 settings, trappings, and genre twists, adopting Silverblatt's (2007) formulaic analysis framework. Firstly,  
5 plot is a planned series of events in a narrative, which progresses through a struggle of opposing forces  
6 to a climax and conclusion. For a more systematic analysis, this study also utilized Tobias' (1993) 20  
7 master plots.<sup>1</sup> Secondly, both main- and sub-characters to examine their inner orientation and character  
8 development are identified. Thirdly, the setting is the physical background against which the action of  
9 the narrative takes place (e.g., the geographical location and the time or period in which the action  
10 occurs). Fourthly, trappings are artifacts that appear so often within a genre that they have become  
11 associated with that genre. Lastly, genre twist occurs when a slight change in some of the formulaic  
12 elements takes place, such as with characters and/or settings (e.g., genre mixing and blending).

## 28 Findings

29  
30 The findings show that the narrative of 'survival' was prominent, whether the series contained zombies  
31 or supernatural monsters, conflicts between the rich and the poor, or personal debts. For example, *Squid*  
32 *Game* (2021) is a death survival game, in which the fear of elimination is equivalent to the fear of death.  
33 The foci of conflict here are extreme competitions and inequalities in capitalist societies arising from  
34 one's sociocultural background and wealth. Such narrative of survival stems from external threats  
35 and/or social issues, which are consequently developed into an internal question of morality. For  
36 instance, some characters in *Sweet Home* (2020) turn into monsters because of internal avidity, while  
37 the ethics of others are constantly tested and challenged as they struggle to remain human. Similarly, in  
38 the 'Gganbu' episode with the marble round in *Squid Game* (2021), the plot revolves around characters  
39 who betray their close allies' trust to survive.

---

56  
57 <sup>1</sup> According to Tobias (1993), there are 20 master plots that can be used to explain almost every story ever told,  
58 and most have existed for thousands of years. The plots consist of the following: (1) quest; (2) adventure; (3)  
59 pursuit; (4) rescue; (5) escape; (6) revenge; (7) riddle/mystery; (8) rivalry; (9) underdog; (10) temptation; (11)  
60 metamorphosis; (12) transformation; (13) maturation; (14) love; (15) forbidden love; (16) sacrifice; (17)  
discovery; (18) wretched excess; (19) ascension; and (20) descension.

### ***Plot***

This ‘survival’ narrative consists of a multi-plot strategy, such as ‘escape’, ‘rescue’, ‘sacrifice’, or ‘temptation’. Plots surrounding escape and rescue appear in zombie and horror dramas, such as *All of Us Are Dead* (2022), *Sweet Home* (2020), and *Hellbound* (2021). For example, *Sweet Home* (2020) is a story about the residents of an apartment who need to fight monsters in isolated circumstances and survive. The feeling of being trapped in an isolated space leads to the fear of contagion, in which the characters realize that they might become monsters themselves. Escape is depicted as a collaborative process, which is achieved from disasters while the characters are surrounded by savage monsters in an isolated apartment. *All of Us Are Dead* is also centered on the plot of escape and rescue: a virus outbreak occurs at Hyosan High School and the infected quickly turn into zombies. The story develops as the students, who are trapped in a classroom, struggle to survive and escape, while the Korean military works intensely to isolate the outbreak to protect the country from an even bigger crisis. In the end, isolated students and residents are rescued. Similarly, *Hellbound* (2021) is a dark fantasy drama series in which supernatural beings (“Angels”) prophesizes a date and time of death, condemning people to “Hell”. Some of those who have been condemned are rescued while others are being slaughtered by demonic enforcers. In addition, the plot of ‘temptation’ plays a significant role in *Squid Game* (2021), the players are greatly motivated to win a large cash prize (of 45.6 billion Korean won), despite their fear of death.

The plots of ‘transformation’, ‘maturation’ and ‘growth’ are also prominently evident in the main characters of all seven dramas. A troubled hermit, Cha Hyun-soo, transforms himself and matures in *Sweet Home* (2020), like all the students in *All of Us Are Dead* (2022) in the process of survival. Ji-woo in *My Name* (2021) also transforms herself into a strong woman who is committed to revenge, through harsh training in a drug cartel. Another form of transformation is metamorphosis, which appears in *Sweet Home* (2020) especially when individuals’ desires transform them into monsters. Examples of the plots driven by ‘riddle’ and ‘quest’ include *Hellbound* (2021) and *Squid Game* (2021). The mysteries of demonic enforcers, angels, a cult religious group and the New Truth Society are critical to the storyline of *Hellbound* (2021). Similarly, in *Squid Game* (2021), the detective Hwang investigates who

1  
2  
3 is organizing the game and the organizers of the game, including Oh Il-nam, and the identity of the front  
4 man are finally revealed.  
5

### 10 ***Characters***

11  
12  
13 In terms of characters, we found that most of the main characters represent the socially weak and ‘have-  
14 nots’ who find themselves in desperate and extreme situations. A victim of bullying (in *All of Us Are*  
15 *Dead* (2022)) and high school dropouts with failed suicidal attempts (in *Sweet Home* (2020)) constitute  
16 representative examples of this finding. The main characters of *Squid Game* (2021) are confronted with  
17 the question of to what extent they are willing to pursue money. Furthermore, these main characters do  
18 not just remain as victims, but rather grow (Cunningham and Scarlata, 2020) through the issue of  
19 morality and an effort to maintain the least amount of necessary dignity and integrity. Moreover,  
20 egoistic and altruistic characters co-exist, and, in the end, a strong emphasis is placed upon altruism and  
21 humanism, even in these least humane situations. There is also the sense of ‘relative morality’, as termed  
22 by Mittell (2015, 143), in the portrayals of these characters. Wayne and Uribe Sandoval (2021) argue  
23 that the moral ambiguity of characters is a viable and important content strategy of Netflix (e.g., the  
24 character of Eleven in the U.S. Netflix series *Stranger Things*). Sung Ki-Hoon in *Squid Game* (2021)  
25 and Bae Yong-Jae in *Hellbound* (2021) are also good examples.  
26

40  
41  
42  
43  
44

### 45 ***Settings and trappings***

46  
47 The use of certain settings and trappings has ambivalent and contradictory meanings, and thus  
48 significantly contributes to the storytelling and the build-up of suspense. For instance, schools and  
49 related trappings such as school uniforms and clothing for physical education are examples of local  
50 specificities. They represent not only the space of the youth, but also a space replete with fear and  
51 suppression due to the extremely competitive educational system that exists in Korea, as seen in *All of*  
52 *Us Are Dead* (2022). Various settings of Hyosan High School in *All of Us Are Dead* (2022) (e.g.,  
53 classrooms, common room, dining hall, library, athletic hall, and school rooftop) and trappings (e.g.,  
54  
55  
56  
57  
58  
59  
60

1  
2  
3 school uniforms, physical education clothing, army/cadet uniforms, and firefighter uniforms) are a case  
4  
5 in point. *Sweet Home* (2020) also features such trappings as school uniforms, army uniforms, and  
6  
7 firefighter equipment, cigarettes, tattoos, alongside typical trappings of zombie apocalyptic stories of  
8  
9 monsters.  
10

11  
12         Outskirts of Seoul and/or the city center have been used as the main settings for *Hellbound*  
13  
14 (2021), *Sweet Home* (2020), and *Squid Game* (2021). The New Truth Society building in *Hellbound*  
15  
16 (2021), an old apartment due to be re-developed in *Sweet Home* (2020), and various places in *Squid*  
17  
18 *Game* (2021) (e.g., an old residential area called Ssang-mun dong, a traditional market, Yeo-ui-do  
19  
20 financial quarters, an orphanage, and a convenience store) are such examples. As for *Squid Game* (2021),  
21  
22 there are settings in real life as well as in the game. For the latter, a desert island is the outdoor space  
23  
24 while hyper-real, fairy-tale style interior is shown indoors, with players' accommodation like a barracks  
25  
26 or a prison camp. Such contrast is shown in another series: for example, in *My Name* (2021), the so-  
27  
28 called Academy, a training camp for Dong-cheon gang members, is shown in a stark contrast to natural  
29  
30 beauty of the backdrop of the East Sea in Kang-won province, South Korea.  
31  
32

33  
34         While the settings consist of typical urban landscapes and contrasting images, trappings seem  
35  
36 to represent more conventional use. For example, typical gangster movies' trappings such as leather  
37  
38 jackers, suits, body tattoos are shown in *My Name* (2021) while typical trappings of a zombie story are  
39  
40 shown in *Sweet Home* (2020). Various masks and makeup are used as trappings in *Squid Game* (2021)  
41  
42 (e.g., the front man's black mask and the animal masks for the VIPs) as well as in *Hellbound* (2021)  
43  
44 (e.g., the YouTuber's makeup and clothes, the VIP mask at the demonstration).  
45  
46  
47  
48  
49

### 50 ***Genre twist***

51  
52 All five series use genre twists and genre blending (or mixing) to accentuate novelty and innovation.  
53  
54 For example, *All of Us Are Dead* (2022) employs genre blending between zombie and teen drama films,  
55  
56 while *Hellbound* (2021) mixes the genres of mystery, dark fantasy, and creature films. Similarly, *Sweet*  
57  
58 *Home* (2020) has elements of creature, disaster, and fantasy genres, whereas in *Squid Game* (2021),  
59  
60

1  
2  
3 there is the co-existence of a conventional survival game genre and reality television format, replete  
4 with contrast between the children's game and the death/survival reality game. Meanwhile, *My Name*  
5 (2021) shows multiple genres being blended across crime noir, action drama, gangster, and family  
6 drama.  
7  
8  
9  
10

11  
12 Certain prominent themes recur from the above genre twists. Humanism, altruism, family-  
13 oriented solidarity, social commentary, and webtoons played a central role in these series. Firstly, the  
14 sense of humanism and sacrifice for loved ones persists through personal relationships, closely-knit  
15 family bonds, morality, and community love. Across all five series that we examined, there was a clear  
16 sense of a deeply humane and emotional approach, even in inhumane situations, such as a death survival  
17 game and a zombie apocalypse. An emphasis on humanism and altruism was identified in all dramas,  
18 with episodes focusing on family-oriented values and community solidarity. Appreciation of high moral  
19 standards, self-sacrifice, and altruist behavior was also evident in relationships with loved ones. For  
20 example, the last message of some main characters (e.g., Cho Sang-Woo and Kang Sae-Byeok in *Squid*  
21 *Game* (2021)) were meant for their families.  
22  
23  
24  
25  
26  
27  
28  
29  
30  
31  
32  
33

34 Secondly, all five series included the focus of conflict between the 'haves and have-nots', as  
35 well as social commentary and satire. They reflected social inequalities (e.g., income disparity and  
36 polarization, unemployment, and debt), unfair treatment of North Korean defectors and migrant workers,  
37 and mental health issues through plots, characters, and stories. For example, *All of Us Are Dead* (2022)  
38 shows that the hierarchical order in the classroom is built based on where the students live (e.g., social  
39 housing vs. luxury apartments). Bullying and violence in schools and the military environment also  
40 reflect such social inequalities. These enable social commentary in these dramas about collective  
41 violence, gang mentality and madness, exclusion, and discrimination. Such issues were actively  
42 addressed by progressive and critical screenwriters and webtoon artists.  
43  
44  
45  
46  
47  
48  
49  
50  
51  
52  
53

54 Thirdly, known for transcending existing boundaries and for sensational, violent, and often  
55 teen-based content, webtoons played a significant role in the genre twists. Three of the series out of five  
56 which we examined – *Sweet Home* (2020), *Hellbound* (2021), and *All of Us Are Dead* (2022) - are based  
57 on cult webtoons. Coined in the early 2000s, the term "webtoon" is a portmanteau term that merges the  
58  
59  
60

1  
2  
3 words ‘web’ and ‘cartoon’ (Kim 2022). Its environment offers paid content and/or free creator-owned  
4 mobile-optimized comics, allowing readers to scroll vertically and binge-read entire series, and  
5 comment on individual episodes (Yeceis et al. 2020, 41).  
6  
7  
8  
9

## 10 11 12 13 **Discussions**

14  
15 Our findings fall into two interconnected categories: homogenizing factors rooted in the  
16 existing genre conventions, and heterogenizing factors arising from uniquely Korean situations  
17 historically, politically, and economically. Examples of homogenizing factors were universal values  
18 such as humanism, altruism, and family-oriented solidarity. Such themes are typically present in the  
19 genre of ‘drama’. Humanism, altruism, and family love are also prominent in the existing conventions  
20 of “Crime” and “Action” genres, not just in K-dramas. This can be considered as transnational proximity  
21 as suggested by Jin (2023, 21). The ways in which *Sweet Home* (2020) explores humanity over  
22 monstrosity resonate with global audiences because there are both unique elements as well as universal  
23 qualities emphasized in the series (e.g., humanism, solidarity within a community) (Jin, 2023). In our  
24 study, these themes were indeed manifested in plot, characters, settings and trappings, and genre twists.  
25 For example, as seen in the character of Kang Sye-byeok in *Squid Game* (2021), the universal value of  
26 family-oriented solidarity was *amplified* with the current North – South Korea divide as well as  
27 economic hardship and a sense of heterogeneity experienced by a North Korean defector (authors’  
28 emphasis). Thus, homogenizing factors and heterogenizing factors were inextricably intertwined in the  
29 sample we examined.  
30  
31  
32  
33

40  
41  
42  
43  
44  
45  
46  
47

48 Meanwhile, heterogenizing factors such as webtoons and traumatic collective memories of the  
49 Koreans enabled the genre twists and blending. For example, webtoon-based dramas such as *Sweet*  
50 *Home* (2020), *Hellbound* (2021), and *All of Us Are Dead* (2022) demonstrated how a zombie genre has  
51 been reconfigured in the Korean context. Newman (2021) comments that *Sweet Home* (2020) imitates  
52 soap opera by following the interlocking lives of a range of people in a small community – 1408 of  
53 Green Home, an old apartment complex – then shakes the genre up by introducing a large-scale  
54  
55  
56  
57  
58  
59  
60

1  
2  
3 supernatural event. Beyond the conflict between monsters and humans, through various characters (e.g.,  
4 Hyun-soo, Sang-wook, and Eun-hyuk), social messages about depression, trauma, suicide, and  
5 solidarity within a community were embedded in the narrative of *Sweet Home* (2020). Similarly, plot,  
6 characters, and settings and trappings of *All of Us Are Dead* (2022) showed how local [Korean] viewers  
7 could relate to the show more due to the similarity between being stuck in the COVID-19 pandemic  
8 and the sinking of the Sewol Ferry, where many students lost their lives when they were instructed to  
9 remain inside the ship (Lee 2022). The Sewol Ferry disaster took the lives of 250 students coming from  
10 Danwon High School in Ansan, a city south of Seoul, in April 2014 (Choe 2022). To use a high school  
11 and related trappings as the setting in *Sweet Home* (2020) and *All of Us Are Dead* (2022) was to employ  
12 heterogenizing factors of uniquely Korean collective memories and associations through which the  
13 conventions of zombie genre and teen shows are twisted.  
14  
15  
16  
17  
18  
19  
20  
21  
22  
23  
24  
25  
26

27 Korea's traumatic history and collective memories throughout most of the twentieth century –  
28 Japanese colonization (1910 – 1945), the Korean War (1950 – 1953), and the rule of military regime  
29 (1961 – 1979) – has left deep psychological scars on the national psyche (Lee 2021). Ongoing political  
30 situations such as the divided state between North Korea and South Korea and collective fears about  
31 recent pandemics (e.g., SARS, avian flu, mad cow disease, and COVID-19) also led to persisting  
32 anxieties. Thus, the homogenizing (universal) factors and the heterogenizing (local) factors have co-  
33 existed in Korea's social, political, economic, and cultural contexts in its modern history, which is  
34 manifested in current K-dramas.  
35  
36  
37  
38  
39  
40  
41  
42  
43  
44

45 Another interesting finding was the role of social commentary and webtoons in our sample. As  
46 can be seen in many films (e.g., *Old Boy* (2004), *Silenced* (2011), *Train to Busan* (2016), *Okja* (2017),  
47 *Parasite* (2019), and *Squid Game* (2021)), social commentary and satire have a strong tradition in  
48 Korean content. However, there are also universal and homogeneous aspects to this: for example, Scott  
49 (2019) asserts that the work of Bong Joon-Ho, the director of *Parasite* (2019), presents a deeply humane  
50 vision of a rotting humanity, and that we all seem to live in the director Bong's dystopia through his  
51 work. Similarly, regarding *Squid Game* (2021), Yoon and Martin (2021) comment that “Korean social  
52 dystopia is not just Korean's dystopia. We are all in that dystopia.” Conran (2022) also suggests that  
53  
54  
55  
56  
57  
58  
59  
60

1  
2  
3 Korea's local, social, and historical parables morphed into high-concept dystopias that attracted global  
4 audiences. According to Lobato (2019, 182), the fundamentally local nature of global taste can be thus  
5 expanded to the hypothesis that local taste has a global nature through the viewing experiences of such  
6 content. In their study of *Squid Game* (2021), Kang and Lee (2022, 41) argue that Netflix targets global  
7 audiences using genre conventions, and commercially portrays historical distinctiveness as a cultural  
8 good. In other words, genre conventions work as homogenizing factors while historical distinctiveness  
9 work as heterogenizing factors, both of which contribute to the transnationalization of K-dramas as a  
10 genre.  
11  
12  
13  
14  
15  
16  
17  
18  
19

20  
21 More importantly, the way that webtoons fuelled the transnationalization of K-dramas was  
22 illuminating, which makes one of the most significant heterogenizing factors. Netflix recognizes  
23 "Webtoon-inspired K-dramas" or "K-dramas based on webtoons" as separate genre classifications. Park  
24 *et al.* (2019) state that the proliferation of mobile phones and the migration of traditional cartoonists to  
25 mobile platforms since 2013 have contributed to the emergence of the webtoon as a source for creative  
26 stories, which then became a reliable and valuable source for many successful drama series. *Misaeng*  
27 (tvN, 2014), *Cheese in the Trap* (tvN, 2016), *Kingdom* (Netflix, 2019), and *Itaewon Class* (JTBC, 2020)  
28 are good examples. Webtoons not only grew in quantity and quality but also contributed to the genre  
29 diversification (Kim 2022). Previously untouched topics covered by webtoons were well suited for  
30 Netflix's drive for innovation and expansion of international content as well as Netflix's content  
31 strategy.  
32  
33  
34  
35

46  
47

### 48 ***Limitations and contributions***

49  
50 As highlighted by Lobato (2018, 252), a limitation of single-platform research is that it can only tell us  
51 the media environment in one distribution system (e.g., Netflix in this case). It is, however, not easily  
52 achievable to conduct qualitative research using vast samples across different platforms. Future research  
53 employing quantitative methods, or a mixed method approach can address this problem and investigate  
54 genre-related questions across different platforms. Another avenue for future research is to expand the  
55  
56  
57  
58  
59  
60

1  
2  
3 study of text to the realm of audience and media industry practitioners. This could be done in a  
4  
5 comparative or multi-country context.  
6  
7

8           However, there are also several contributions that our study makes. Our findings support some  
9  
10 key existing studies in the field: for example, Jenner (2018) argues Netflix's transnationalism and its  
11  
12 content strategy use genre and its conventions as well as globally accepted values to produce diverse  
13  
14 content to appeal to international audiences. We found the co-existence of universal values and uniquely  
15  
16 local factors using the Korean case, each of which worked as homogenizing and heterogenizing factors  
17  
18 toward the transnationalization of television. From Netflix's three licensing conditions mentioned  
19  
20 earlier (namely, commissions, co-commissions, and acquisitions), all five series that we examined were  
21  
22 the outcomes of Netflix 'commissioning' local productions (hence, titled Netflix Originals). Under such  
23  
24 a condition, substantial creative input came from webtoons, a relatively new source for K-dramas,  
25  
26 covering diverse social issues. Webtoons with social messages reflect distinctive local characteristics  
27  
28 and history, and at the same time, transnationally proximate feelings and experiences. Thus, we also  
29  
30 found strong evidence to support Lotz's (2021) argument that Netflix's multi-territory program sourcing  
31  
32 and content strategy represent its ethos of innovation, business strategy, and transnationalism. In  
33  
34 addition, this study fills the gap in research that is the lack of textual readings of key genres in K-dramas  
35  
36 despite the emergence of a multitude of new genres and patterns each year (Kim 2022, 92). Through  
37  
38 the theoretical lens of genre studies, we offer the textual characteristics of five Netflix Original K-drama  
39  
40 series, while analyzing homogenizing and heterogenizing factors at play in today's transnational  
41  
42 television.  
43  
44  
45

For Peer Review

**Table 1.** Details of the selected Netflix Originals K-dramas

Title (Year)	Genres	Storyline
<i>Sweet Home</i> (2020)	Dramas, Korean, Based on Webtoons, Thriller, Horror	An unexpected savior protects the children from harm as Hyun-su, together with Yoon Ji-su and Jung Jae-heon, tries to bring them to safety.
<i>Hellbound</i> (2021)	Korean, Mysteries, Crime, Based on Webtoons, Thriller, Horror	An angel prophesizes a date and time of death. Demonic enforcers carry out the slaughter. Could this truly be punishment for sinners by a higher being?
<i>Squid Game</i> (2021)	Korean, Crime, Thriller	Join the game. Play by the rules. Get rich beyond your wildest dreams. But be aware: One wrong move could cost you your life.
<i>My Name</i> (2021)	Action and Adventure, Korean, Crime, Thriller	On her birthday, Yoon Jiwoo witnesses the horrific death of her father. Hell-bent on taking revenge at any cost, she sets out to find his killer.
<i>All of Us Are Dead</i> (2022)	Drama, Korean, Teen, Based on Webtoons, Horror	First one student. Next a high school. Then an entire city. As a zombie apocalypse spreads fast, only those who can help themselves may stay alive.

Source: Authors' table (collated from Netflix website; Genres and storyline are as shown on the Netflix website, correct as of 30<sup>th</sup> December 2023).

## Genre in transnational television: A case of Netflix Originals Korean dramas

### Response to Reviewers [Minor revision]

Reviewer 1 – Minor Revision	
Reviewer Feedback	Author Response
1.1 Thank you for your revisions. It is now a much clearer and well-structured article.	Thank you very much for your continued support and guidance. Your detailed feedback was very helpful. Thanks to your constructive criticism and relevant suggestions, we were able to go through another round of revision, as a result of which the paper is substantially improved. We sincerely hope that it now sufficiently meets the standards of the journal.
<p>However, I do still have a few suggestions for revisions that in my opinion are needed in order to meet the standards of <i>Television and New Media</i>.</p> <p>The first suggestion relates to the sampling of genres and the overarching theme of exposing and satirizing the gaps in wealth:</p> <p>Could you be a little more concrete as to why you chose only series within horror and action and thriller genres? And why did you choose only series that dealt with the theme of the wealth gap? I'm sure there are convincing reasons, but I just need to know what these reasons are.</p>	<p>Thank you very much for your comments. The rationale behind the selection of five series is now much more clearly elaborated in the paper. From the global top 100 dramas from 2020 to 2022, we have shortlisted the top three most frequently appearing genres, that is, drama, crime, and horror and action. From these three categories, we have selected the five series that are most appropriate to address the research gap in the field.</p> <p>While there were several other qualifying series in the drama genre, they were primarily romance comedies. K-drama's representative romance genre - what An (2022, 96) calls 'K-romances' - has been studied a lot more often than crime, horror and action genre which contain more experimental and newer genre narratives. We selected these five series as they</p>

		<p>were more appropriate to address the research gap. Regarding the wealth gap, the description was not entirely apt and we have now addressed this problem. We went through the paper as well as five selected series and revised accordingly. More precise descriptions are now used (e.g., social inequalities, income disparity). So, it was not the case of us selecting the dramas that are dealing with only the wealth gap; rather, it was not very well articulated in the previous submission.</p> <p>An, Ji-yoon. 2022. "New directions in K-drama studies." <i>Journal of Japanese and Korean Cinema</i> 14(2): 91-97.  <a href="https://doi.org/10.1080/17564905.2022.2120280">https://doi.org/10.1080/17564905.2022.2120280</a></p>
1.2	<p>Secondly, on page 15 (line 12) there is a sentence that I think is left over from the language review as it doesn't make much sense otherwise: "These sentences don't flow, in the sense that "Secondly" is followed by a verb (identify) and the other sentences are more definitions." Please, delete this sentence.</p>	<p>Thank you for your feedback. That sentence was indeed left over from the language review. It is now deleted and the whole paragraph is revisited to make sure that we clearly explain the five elements that have been analyzed in this study.</p>
1.3	<p><b>Finally, and most importantly, your conclusion and discussion need to be rewritten in a much more structured way.</b> As it is now, I am finding it very difficult to carve out what exactly are your conclusions and contributions.</p>	<p>Thank you for your feedback.</p> <p>We have now re-written the discussions and conclusion, with a clear and coherent structure. We hope this does not leave any ambiguous part. We have also revised the abstract (e.g., removing the statement of 'inextricably</p>

	<p><b>One suggestion could be to be much clearer about what you believe are the homogenizing factors and the heterogenizing factors.</b> As I read it, only the homogenizing factors are clear to me.</p>	<p>intertwined’, adding clear explanations of what we found) so that it is crystal clear from the outset. Thank you very much for pointing this out.</p>
1.4	<p>One last little thing (maybe just as much for the editors of the journal): I like that you discuss the limitations of your study but, in my personal opinion, I think it should be discussed in the methods section of the article, and not at the end after the conclusion. But maybe the editors can make a decision as to whether it's well-suited where it is.</p>	<p>Thank you for your feedback.</p> <p>We have now re-written the last section of the paper. As it was difficult to integrate the limitations of the study in the Methodology section, we have made a subsection of ‘Limitations and contributions’ within the Conclusion section. This also address the other comment about clarifying our contributions to the field.</p> <p>As you kindly suggested, we will leave this to the Editors to decide. Moving the limitations to the Methodology section will not be a problem either. Thanks!</p>
<b>Reviewer 2 – Major Revision</b>		
2.1	<p>The revised manuscript has much benefited from the modifications made in the scope and the approach. Although the thesis is not as ambitious as before, the research strikes much more grounded and persuasive. The changes in the structure also</p>	<p>Thank you for your kind words and your appreciation of our efforts during the major revision process. We hope that this provides a grounded, persuasive, and informative paper for the readers. We also thank you for your comments about how the revised conclusion was much improved after the first round of major revision.</p>

	<p>highlight the arduousness of the research.</p>	<p>However, the Reviewer 1's feedback suggests that some of our points in the Conclusion are not clear enough. For example, the Reviewer 1 commented on how and why we need to make "inextricably intertwined" factors - homogenizing and heterogenizing – clearer for the readers.</p> <p>We have therefore taken both Reviewers' comments on board and made the Discussions and Conclusion more in sync, whilst our findings and arguments are presented in a way that is much easier to follow and clearly understandable. This was also done in Abstract section.</p>
2.2	<p>Still, there is one remaining concern: The conclusion, while containing some insightful interpretations of the findings, also includes discussions that are disconnected from the research or appear so. The author claims that the findings demonstrate the interworking of " homogenizing factors rooted in the existing genre conventions" and "heterogenizing factors arising from uniquely Korean situations," which is a very persuasive argument directly supported by the research. Further discussions on how homogenizing factors and heterogenizing factors are "inextricably intertwined" in</p>	<p>Thank you very much for your detailed feedback.</p> <p>As explained above, this section is now much more clearly structured, with the detailed examples from our sample. In addition, we specified why it is deemed as unique and local (e.g., the setting and trappings of the sample related to the Sewol Ferry disaster and how 250 students lost their lives when they did what they were asked to do: to remain in the cabin). It is also clearly explained when and how universal values – homogenizing factors – are accompanied and amplified by heterogenizing factors, using the case of a character in Squid Game.</p>

	<p>the third paragraph are also convincing, and the use of textual examples in the same paragraph is effective. The following paragraph adds depth to the argument by further exploring the link between the national trauma and the textual qualities of the sample programs.</p>	
2.3	<p>However, the discussion on the zombie genre in the 2nd paragraph is neither supported by the research nor very relevant to the topic. Only one of the five samples examined belongs to the zombie genre. While a brief mention of the trend may offer a useful piece of information, an entire paragraph on the zombie genre in Korean film and television and its historical context is inappropriate for this manuscript.</p>	<p>Thank you very much for your feedback.</p> <p>We have now removed the paragraph and re-wrote the section, with using only the relevant studies and arguments.</p>
2.4	<p>The webtoon adaptation discussed in the last paragraph is much more relevant, but its presentation is misleading. The focus of the paragraph appears to be the importance of webtoon for Netflix K-dramas although webtoon adaptations should be examined as one of the "heterogenizing factors." The content may not need significant changes, but the sentences need to be revised to</p>	<p>Thank you for pointing this out. Yes, indeed, the focus should have been re-adjusted and it has been revised to address your comments. It now shows in what way webtoons were facilitating and fuelling the K-dramas more toward the transnationalization of television, incorporating homogenizing and heterogenizing factors. Previously-tabooed topics were able to discussed in these dramas, which in return fits the Netflix's content strategy. This is also linked to our contributions as such findings support previous studies.</p>

	connect the topic of webtoon adaptations clearly to the larger discussion of homogenizing and heterogenizing factors.
